INDIVIDUAL PROPERTY/DISTRICT
MARYLAND HISTORICAL TRUST
INTERNAL NR-ELIGIBILITY REVIEW FORM

Property/District Name: Chance Building Survey Number: AA-2164

Project: Glen Burnie Light Rail Extension Agency: FTA/MTA

Site visit by MHT Staff: no yes Name E. Hannold, P. Kurtze Date June 20, 1996

Eligibility recommended Eligibility not recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

Based on the available information, the Chance Building does not appear to meet the National Register Criteria for individual listing. The large two story commercial building was constructed in 1939. Constructed of concrete block, it has brick veneer on the first story of the front elevation and stucco and wood half-timbering on the second story. This building was among the first commercial properties erected along Govenor Ritchie Highway, constructed between 1934 and 1938 as a scenic highway linking Baltimore and Annapolis. The new highway rapidly developed with commercial properties. This building is among the few remaining early commercial buildings as the area is now characterized by strip malls, car dealerships and fast-food restaurants. However, the building has been substantially altered and no longer conveys a sense of its original character. Moreover, it is not sufficiently significant on its own to represent the early commercial development of the area. Therefore, due to nsufficient integrity and lack of sufficient significance, the Chance building does not appear to meet any of the National Register Criteria. It is located well outside the National Register eligible section of Glen Burnie.

Documentation on the property/district is presented in: Project File, Maryland Inventory
Form AA-2164

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Contributing Resource Count: 1 building.

This large, two-story commercial building is constructed of concrete block. Brick veneer clads the first story of the front elevation, and the second story is covered with stucco and wood beams, creating a half-timbered effect. The first floor of the front elevation is glazed with large store-front windows. A metal plaque affixed to the front elevation states "Chance Building 1939." An office supply store called International Office Products is located in the left half of the building, and Carol's Western Apparel is located in the right half. A concrete walk that runs the width of the building is sheltered by a flat-roofed canopy, supported on posts. A large, rearing, fiberglass horse is affixed to the top of the canopy near the center of the building. Above the canopy, an asphalt-shingled, shed-roofed overhang is attached to the parapet on the front elevation. On the second story, windows on the front and side elevations are asymmetrically arranged singly and in pairs. The six-over-one sash windows in the building are possibly original, while others are one-over-one replacements. The southwest side of the building appears to have been recently resurfaced with stucco. It is embellished with protruding bands of stucco in a contrasting color that form a string course and window surrounds.

8. Significance

 Level of Significance: national state local

Prepare both a summary paragraph of significance and a general statement of history and support.

Built in 1939, this building was among the first commercial properties erected along Governor Ritchie Highway. The roadway was built between 1934 and 1938 as a Works Progress Administration project and was intended as a scenic route between Baltimore and Annapolis. Newspaper articles filed at the town library chronicle its early planning and construction and indicate that community activists, including the Federated Garden Clubs, favored restrictive covenants to prevent billboards and hot dog stands from lining the roadway. Commercial interests prevailed, however, and Ritchie Highway was rapidly developed with commercial properties. This building is among few of the early commercial buildings that remain amid a nearly continuous flow of parking lots, strip malls, car dealerships, and fast-food restaurants. Its first floor was occupied by stores, and city directories indicate that apartments were located on its second floor.

The building appears to have been altered with the addition of new stucco, brick veneer, and the shingled shed overhang. Because the building lacks integrity of design, materials, and feeling, it is recommended not eligible.
