DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The main dwelling at Rose Hill (now called Strawberry Hill) was demolished in and replaced by a modern split-level dwelling, making it the third house on that site. See CLVT-7, (Brinkman) for information on previous houses.

There are seven other buildings on the property which are historically and architecturally important. This farm is the last in the area of old Smithville (Dunkirk) still in the possession of the Smith family. Besides the main house, there is

Building A. A stable measuring 20' x 30'. The exterior is board and batten. The interior contains eight stalls separated by a center aisle on the first level and there is a hayloft above.

Building B. A tobacco barn measuring 40' x 48' and constructed of machine cut lumber that is nailed together. It has the familiar three part plan with the center portion containing opposite standard double doors measuring C. 9 $\frac{1}{2}$ ' x 12'. Every fourth or fifth board of the vertical siding is mounted on butt-hinges.

Building C. This board and batten structure appears in a 1925 photograph in the Smith family papers. The boards average 9 $\frac{1}{2}$ ' inches in width and the battens 3 $\frac{1}{2}$ ' inches. There appear to have been many alterations and repairs although the south facade appears to be in original condition.

The structure is built into the side of a hill, thus it is like a German bank barn in that it is one story high on one side but two stories on the other. The semi-subterranean level provides a concrete foundation 8' in height.

Building D. This may be the oldest structure on the farm; its dates are at least those of the second house that was built after the fire of 1780. It is constructed of overlapping clapboards nailed to a post-and-beam frame which is made of hand-hewn timbers joined via mortise-and-tenon with trunnels.

Exposed rafters and size suggest that this was a meat house and family tradition supports this claim. The building is 10'5" square with 6' walls.

Building E. Mrs. Mettan who is years old and has spent much years of her life at Rose Hill says that this tenant house was built C. 1916. Some changes have taken place since then. In its present state, it is T-shaped in plan with the front (S) being three bays and one deep. The entrance is in the center of the front facade and a four posted porch runs the entire length.

There is a rear (N) portion of the house 16' in length and 14' in width. A porch, which has been enclosed occupies the northeast corner of this wing and measure 5'7' x 9'. Both front and back portions of the house are 2 $\frac{1}{2}$ ' stories high with A-frame gable-end roofs. There is no fire place although there is a chimney to facilitate wood and coal stoves.

Building F. A tobacco barn measuring 28' x 44', three part in plan with opposite doors in the center section measuring C. 10' x 12'. The frame is machine

STATEMENT OF SIGNIFICANCE

The deterioration and subsequent demolition of the main dwelling at Rose Hill certainly diminished the effectiveness of the farm to act as a visual document of local history and Nineteenth Century rural life, but the farm is not totally void of this ability. There are in fact seven other structures remaining to tell the story of this the last property in the vicinity of old Smithville to remain in the Smith family.

The farm is on land which was part of the original Smith grant.

circular cut and nailed.

Building G. Also a tobacco barn and appears to be older than Building F, Mrs. Mettam that the oldest barn on the property is on the hill "back toward Adees" (Building H) and dates from "early 1900's". It is also the largest and the addition on the south side makes it measure 40' x 60' in overall size.

Mrs. Mettam says that her father built another barn and tenant house to the west of these buildings but they are no longer standing. An unidentified photo in the Noyes Collection of Smith Family papers may be that barn.

Building H. This building is reputed to be slave quaters, although structural analysis indicated that it is not that old. The lack of a hearth, types of nails etc. suggest that the cabin was not built to house slaves.

Nevertheless, the building may well be a late 19th Century structure. It is structurally divided into two parts, suggesting an addition. The west portion is the largest, it is three bays wide and one deep. The door is central. The east portion is two bays wide and one deep with one door and one window on the front (S) facade. Both portions form a one-story building measuring 38'6" in timbers are visible in the west portion, the windows are 4/4 and the chimney bricks appear to be older than those on the east chimney. The windows in the east portion are 6/6; there is wavy glass in both.

The buildings is in a state of near ruins and the numerous patches etc. result in various types of siding, however, the oldest appears to be butt joined. Some square head nails are visible among the many types used. Evidence of whitewash around the sopping suggests that at one point the cabin was painted.

Mrs. Mettam remembers two other buildings at Rose Hill which were called slave quaters. One was "directly left of (the) Maple tree by (the) strawberries (where there is now an above ground swimming pool.) It had huge chimney-open hearth (with) cupboards on either side. All clothes (were) stored in trunks there."

Another building was "by peach trees over by the tenant house (Building E)" and it had "huge steps, three doors and chimneys (on) both ends and middle." These excerpts taken from Mrs. Mettam to Mrs. Noyes on May , 1976 in response to questions asked by this surveyor.

There is a central door with an overlight and an exterior chimney on either end of the house. The clapboarding is 19th C. and narrow on the main house. The windows are 9/9. The mantels are early Federal, decorated with oval recessed designs, and slender reeded columns on the side. The door and window frames are pedimented, cut in flat boards in a very simple Greek Revival style. The staircase is early 19th Century. The balusters are simple round ones, but the newel post is an overblown Victorian one. The present owner, Mrs. Mettam, a descendant of the original owner (who obtained the land from the original Smith grant) states that an older house on the site burned around 1780, and this one was built 10-20 years later. The 2 one storey connecting additions are older, 1760 at least, originally a kitchen and small room. The windows are 6/6 and very old bubbly glass. The pitch of the roof is steep. Originally a huge walk-in fireplace was on one end, but this is now gone. This section has vertical beaded panelling on the interior divider walls and horizontal panelling on the outer walls. The ceiling has all exposed beams. There is a very small staircase in one corner which leads to the</p> <p>The boxwood planting on the property was listed as 230 years old in 1930 by the Towson Nurseries. There is a slave cemetery with approximately 50 graves on a hill behind the house. The slaves never left the house after the Civil War but stayed on. A meathouse behind the house is said to be approx. 150 years old, although it has largely been rebuilt. Mainhouse also has a small Victorian addition. All of the wood used in the house is black walnut which was cut on the property.</p>
