CAPSULE SUMMARY
CT-801
National Guard Armory
175 Armory Road
Prince Frederick, Calvert County
1953-1954
Public

The National Guard Armory, also known as the Louis L. Goldstein Armory, is located at 175 Armory Road in Prince Frederick, Calvert County, Maryland. The National Guard Armory was constructed between 1953 and 1954 to serve as a military outpost for the Maryland National Guard, and is the only such public building of this type in Calvert County. The minimal Art Deco-style brick building was designed by architect Lawrence P. Sangston and built by contractor Charles B. Tovell. The armory was intended to serve as a community meeting hall and gymnasium for athletic events during peacetime, and as a government and military staging area in times of emergency, such as war or natural disaster. Military personnel serving at this location are members of the Maryland Defense Force, 5th Battalion, Company B, serving Charles, St. Mary's and Calvert Counties. The building was recently renamed in honor of Louis L. Goldstein, a prominent local and state politician. Typical of government buildings constructed during the mid-20th century, the National Guard Armory in Prince Frederick is an excellent example of the building type, with its dual military and civic functions.

The two-story masonry building is constructed of brick laid in three-course American bond with a slightly projecting central bay that is clad in sandstone panels. Set on a concrete foundation, the building is covered with a combination gambrel and parapet roof. The two-story main block of the building houses the main lobby with offices and classrooms. It is surrounded by one-story side wings and the two-story open drill hall at the rear. The interior is finished in tile and wood flooring, with plaster walls and a ceramic-tile wainscot in the major rooms. To the southeast of the armory is a freestanding garage, which is a brick and steel-frame structure dating from the middle of the 20th century. To the west is a small, one-story brick structure constructed in the mid-1950s.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The National Guard Armory, also known as the Louis L. Goldstein Armory, is located on Armory Road in Prince Frederick, Calvert County, Maryland. Constructed between 1953 and 1954, the National Guard Armory was designed by architect Lawrence P. Sangston and built by contractor Charles B. Tovell to serve as an armory for the United States National Guard. The two-story masonry building, featuring minimal Art Deco-style detailing, is constructed of brick laid in three-course American bond with a slightly projecting central bay that is clad in sandstone panels. Set on a concrete foundation, the building is covered with a combination gambrel and parapet roof. The two-story main block of the building houses the main lobby with offices and classrooms. It is surrounded by one-story side wings and the two-story open drill hall at the rear. The interior is finished in tile and wood flooring, with plaster walls and a ceramic-tile wainscot in the major rooms. To the southeast of the armory is a freestanding garage, which is a brick and steel-frame structure dating from the middle of the 20th century. To the west is a small, one-story brick structure constructed in the mid-1950s.

EXTERIOR DESCRIPTION

The façade or southwest elevation of the armory stands seven bays in width with a slightly projecting central bay that is clad in sandstone panels. This bay is accentuated by a stepped-parapet roof with sandstone coping. The entablature is further detailed with a cyma profile at the cornice and a narrow stringcourse. The frieze of the parapet is inscribed with the words "Maryland National Guard." Recessed, double-leaf metal doors pierce the first story of this central bay. Directly above this opening is a tripartite metal industrial awning window. The entry bay of the main block is flanked by secondary bays, each pierced by three window openings on the first and second stories. Like the central bay, these flanking bays are capped by sandstone coping with a cyma profile. The bays have slightly projecting concrete bases, a feature that is carried throughout the remaining elevations of the building. The projecting concrete foundation serves as a continuous sill for the first-story window openings. Projecting to the sides of the main block are one-story, two-bay-wide wings, each featuring two metal industrial awning windows. Visible to the rear of the one-story wings on the east is the two-story southwest elevation of the drill hall, which is pierced by a single-leaf door at the first story.

The southeast elevation is dominated by the two-story drill hall at the rear of the main block. This portion of the elevation is three bays in width, with a stepped parapet roof and raised brick quoins setting off the central bay. The central bay is further defined by a large vehicular door. Above this entry is a sandstone panel with the initials "MNG" (Maryland National Guard) carved in it. The flanking bays of the central portion are slightly set back. Each bay features a single-leaf entry opening on the first story and a single window opening on the second story. Set back from the primary façade of the elevation is a one-story wing (set to the southwest). It features paired pedestrian doors and a single metal industrial awning window. The southeast elevation of the main block is visible. Two pedestrian doors allow access onto the roof of the one-story extension. Paired pedestrian doors pierce the southeast elevation of the one-story extension.

The northeast elevation consists of two distinct building sections, the two-story drill hall and the one-story wing. The dominant section of this elevation is comprised of the exterior wall of the drill hall. It is centrally pierced by seven evenly spaced clerestory windows. The adjoining one-story wing projects from the northwest corner of the drill hall and features three window openings. Like those on the façade, the metal industrial windows are set along the slightly projecting foundation, which serves as a continuous sill.

The northwest elevation of the armory is comprised of three distinct building phases, the main block of the structure, the two-story drill hall, and the one-story wing. The one-story side wing is pierced at the southwest corner of the building by three metal industrial awning windows. Like those on the façade, the projecting foundation serves as a continuous sill, uniting all three openings. Neither the main block or the drill hall have window or entry openings.

Maryland Inventory of Historic Properties Form

Inventory No. CT-801

Name National Guard Armory (preferred)
Continuation Sheet

Number 7 Page 1

INTERIOR DESCRIPTION

The interior of the main block is divided into offices, with the center lobby at its core. The side hall to the northwest is flanked by offices, while a lounge/classroom is located to the southeast. These rooms are finished with plaster walls and ceilings, tile or wood floors, and a high ceramic-tile wainscot. Doors throughout are either hollow steel or hollow plywood. The lounge on the first floor of the main block is finished in hard wood paneling and exhibiting a massive stone fireplace and chimney. The rear of the building is dominated by the large, open drill hall. The drill hall is finished as a gymnasium, with a highly polished wood floor and basketball hoops suspended from the ceiling. Further, an arched roof supported by a wood-frame structure details it. Seven clerestory windows on the northeast wall provide light for the drill hall. The southeast wall of the drill hall features a large opening intended to provide vehicular access to this space. The flanking wings provide warehouse and storage space as well as ancillary office space.

The second floor of the building was not accessible at the time of the survey.

OUTBUILDINGS

Directly to the southeast of the armory building is a one-story brick and steel-frame garage that was constructed in the middle of the 20th century. It covered by a flat roof with a parapet. The structure has eight garage door openings reinforced with steel I-beam lintels and rectangular brick piers between each opening. Each entry is further subdivided by a narrow steel pier. Thus, sixteen openings are created, each covered with a metal roll-up door. Steel bulwarks to protect the structure from impact by vehicles are affixed to the base of the brick and steel piers. Concrete paving links the garage to the southeast elevation of the armory.

A short distance from the west corner of the armory is a small brick structure with a concrete foundation and a corbeled brick cornice. Standing one story in height, the modest building was also constructed in the mid-1950s. On the northwest elevation of the structure is a wooden door, which provides access to what appears to be a water pumping or septic system.

The National Guard Armory, also known as the Louis L. Goldstein Armory, is located at 175 Armory Road in Prince Frederick, Calvert County, Maryland. The National Guard Armory was constructed between 1953 and 1954 to serve as a military outpost for the Maryland National Guard, and is the only such public building of this type in Calvert County. The minimal Art Deco-style brick building was designed by architect Lawrence P. Sangston and built by contractor Charles B. Tovell. The armory was intended to serve as a community meeting hall and gymnasium for athletic events during peacetime, and as a government and military staging area in times of emergency, such as war or natural disaster. Military personnel serving at this location are members of the Maryland Defense Force, 5th Battalion, Company B, serving Charles, St. Mary's and Calvert Counties. The building was recently renamed in honor of Louis L. Goldstein, a prominent local and state politician. Typical of government buildings constructed during the mid-20th century, the National Guard Armory in Prince Frederick is an excellent example of the building type, with its dual military and civic functions.

HISTORY OF THE NATIONAL GUARD ARMORY, PRINCE FREDERICK

The military presence in Calvert County was generally minimal except during times of war. County seats throughout the United States were equipped, however, with a National Guard Armory to execute military operations and assistance in times of crisis or war. Armories were historically buildings in which weapons were made and housed, and because of their military function, the style in which they were executed tended to be heavily fortified and suggestive of Gothic Revival architecture. By the 20th century, the function of the armory had become more of an administrative one, serving the purpose of maintaining a constant military presence in a community. They also maintained some of their historic function and were used to house weapons and other military equipment. In peacetime, because of their ability to house large numbers of people, 20th-century armories in particular have been used not only for National Guard exercises, but also for community events and athletic games, the latter facilitated by the finishing of the drill hall as a gymnasium. They are also used for emergency housing and other related services.

The National Guard Armory in Prince Frederick, designed by architect Lawrence P. Sangston and built by contractor Charles B. Tovell between 1953 and 1954, is exemplary of the 20th-century armory building type. Military personnel currently use the offices on the first and second floors of the building, while the centrally located drill hall is used for both National Guard exercises and community athletic events. Military personnel serving at this location are members of the Maryland Defense Force, 5th Battalion, Company B, serving Charles, St. Mary's and Calvert Counties. Activities that the Company participates in include emergency response, urban search and rescue, Honor Guard, Color Guard, Burial Detail, and other military ceremonies. Additionally, they serve the local community by training Venture and Explored troops of the Cadet Corps, assisting State and Sheriff law enforcement agencies, and by providing site security, visitor assistance, and crowd control at large events. In 1999, the members of the Prince Frederick Armory assisted with site security, medical support, and traffic control at the following Calvert County events: the North Beach Fireman's Carnival, the Solomons Island Benefit Concert, Memorial Day Services, the Budds Creek National Motorcross

Championship, and the Serenity Farms Bay Jam 1999 Concert.

The building was recently renamed the Louis L. Goldstein Armory following the death of the prominent and well-liked Calvert County politician. Louis L. Goldstein (1913-1998) was born in Prince Frederick and attended Washington College and the University of Maryland School of Law. He served in the United States Marine Corps from 1942 until 1946, before becoming a member of the State Senate in 1947. As a member of the State Senate, representing Calvert County from 1947 to 1958, he served as the Majority Leader from 1951 to 1955 and as the Senate President from 1955 to 1958. Goldstein was perhaps best known for serving as the Comptroller of the Treasury for the State of Maryland from 1959 until his death in 1998. (1)

The armory was constructed on land owned by Louis L. Goldstien's parents, Goodman and Belle Goldstein. On May 26, 1948, the Goldstiens sold 4.11 acres of land to the Calvert County Commissioners. A restrictive covenant was placed in the deed, stating that the property "shall be used for the erection of a State Armory thereon, said Armory to be constructed with a period of five years from date hereof." Further, the deed stated that if the armory was not constructed within the five-year period that the land would revert to Goodman Goldstein. (2) A month following the conveyance of the property to the County Commissioners, it was sold to the State of Maryland for use by the Department of Militia. According to the deed, the parcel of land was for the purpose of erecting a State Armory and establishing a National Guard Unit. (3)

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This is a two-story brick and sandstone structure built as an armory. The appearance of the building is dominated by the advanced central pavilion which is faced entirely in sandstone. The detailing between the first and second-story bays of this central section are executed in the Art Deco style. There are also distinctive Art Deco-style light fixtures and flagpoles. The brick fabric is three-course American bond. There are three bays to either side of the central pavilion, each glazed with three-part metal-muntined casement and louvred windows. The brick sections have sandstone plinths and severe sandstone cornices. Two-bay one-story brick wings extend from each end of the building. The structure faces south.
