

## CAPSULE SUMMARY CT - 1139

Whitehall or Eisenman Barn 'C' is located in Dunkirk adjacent to the tenant house on this large, privately owned farm. Mary Eisenman recalls this barn being built in c. 1934-36 to replace a barn that was blown down in a hurricane. Originally constructed as a 24 x 64 foot building with a plank and tar paper roof, a shed was later added on the south side. Windows centered on the south facade created an interior stripping area. At a later date, this area was set back and enclosed to create a stripping room. Finally, barn and shed extensions were added to the east end.

Whitehall or Eisenman Barn 'C' is located on the north side of Yellow Bank Road. The barn is associated with a surrounding farm owned by the Eisenman family, and is adjacent to a tenant house. The farm dates to the early 19th century, (although the present house was built circa 1850) and includes three other tobacco barns, two rental houses, and a polling house which was moved to the property. An earlier tobacco barn stood on the site of the polling house but was blown down in a hurricane in 1936.

This is a somewhat curious barn. Mrs Eisenman remembers the date of construction as being c. 1934-36 (the same year that a cyclone took down the old barn, blew the roof off the "Brick House", and demolished a "colored" school). The barn is constructed of mostly circular sawn materials, although a few hewn materials and peeled log tier poles were probably re-used from the old barn.

This barn was originally constructed as an 24 x 64 foot (16 room) building with a plank and tar paper roof and two single plank, side-hinged doors (hung on pintels), A shed was later added to the south side with windows installed to create a stripping area. This shed has a continuous sill and basically identical framing techniques, but it constructed of "lighter" materials (posts, nailers, plate). The stripping room was set back and enclosed with a variety of materials, possibly salvaged from this barn's south side.

The lower east gable end appears to be replaced and so no early door is evident. The plan of the barn appears to be two cross aisles (not centered) running north-south in the original 16 room barn. Sometime later, barn and shed extensions were added to the east end. These extensions added four rooms to the barn and four rooms to the shed.

Prepare both a summary paragraph of significance and a general statement of history and support.

This barn is somewhat typical of tobacco barns constructed in the second quarter of the 20th century in southern Maryland. The longer, more rectangular extended aisle plan is characteristic of this period. Further, the barn's construction can be traced to a particular date (and event). Additional changes and modifications to the structure certainly add to our understanding of changes in construction techniques, materials and agricultural practises.

Historic Period Them(s): Depression, agriculture, tobacco  
Geographic Organization: western shore, Chesapeake Bay, Calvert County  
Chronological/Developmental Period: 1934/36-present
