

CAPSULE SUMMARY CT-1158

The Godlewski barn is located on the north side of Plum Point Road, approximately three miles from its intersection with highway four. Access is private. The barn is set up on top of a slight rise, and the ground slopes down gently below the south facade. This barn apparently consists of two equal sized barns built up against each other. The original barn measured twenty-four by twenty-four feet, and probably dates to the early nineteenth century. The equal-sized addition to the west is of an unknown period. It is interesting that the cross-axial plan and size of the original barn are exactly duplicated in the addition.

7. DESCRIPTION CT-1158

The Godlewski barn is located on the north side of Plum Point Road, approximately three miles from its intersection with highway four. The barn is set up on top of a slight rise, and the ground slopes down gently below the south facade. The barn was recorded from the exterior.

The barn was apparently built in two stages. It measures forty-eight by twenty-four feet and has a sixteen foot wide shed on the south side. The section to the east (section A) is more weathered than section B to the west. It was probably built first. Section A measures twenty-four by twenty-four feet. Section B also measures twenty-four by twenty-four feet and has a four foot wide door centered along the west gable end. There are also two sets of double doors along the south facade. Each set is centered along the twenty-four foot width of its corresponding section. The siding on the barn is vertical and it is covered with a relatively low pitch corrugated metal roof.

8. SIGNIFICANCE CT-1158

This barn is significant because it apparently consists of two equal sized barns built up against each other. If, as determined from the exterior, the original barn measured twenty-four by twenty-four feet, it probably dates to the early nineteenth century. The equal-sized addition to the west may date to any period, as there is no consistency in size of additions. It is interesting that the cross-axial plan and size of the original barn are exactly duplicated in the addition.

This barn also yields information regarding agricultural history in Southern Maryland. In February 1990, a tobacco barn survey was initiated in order to study the tobacco barns of Calvert County. Until fairly recently, tobacco was the most important farm crop of the county. More acreage was devoted to its cultivation than for both of the next most extensive farm products (corn and wheat). The barns and stripping houses related to this "Tobacco Culture" are widely recognized as the most common element on the rural landscape. These structures are also the most threatened, as the market for tobacco declines. They seem to have, at present, only limited capabilities for re-use. Many barns and stripping houses now stand empty. The purpose of this survey has been to gather information and document a wide sample of these structures before they disappear from the landscape.

Historical Period theme(s): 1830 Tobacco; Agriculture
Geographical Organization: Western Shore Chesapeake Bay Calvert Cty MD
Chronological/Developmental Period: 1830-Present
Resource Type(s): Tobacco Barn

The original barn was expanded by an addition of equal size and plan to the west. The shingle roof was replaced by metal.
