

**INDIVIDUAL PROPERTY/DISTRICT
MARYLAND HISTORICAL TRUST
INTERNAL NR-ELIGIBILITY REVIEW FORM**

Property/District Name: William G. & Josephine E. Ashby House Survey Number: G-IV-A-190

Project: US 219/Oakland Vicinity Improvement Project Agency: MSHA

Site visit by MHT Staff: No Yes Name _____ Date _____

Eligibility recommended Eligibility **not** recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

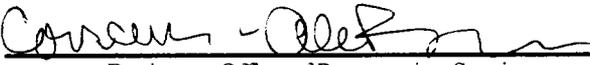

The William G. and Josephine E. Ashby House, built *circa* 1930, relates to the continued expansion and settlement of the Oakland and Mountain Lake Park areas in the early to mid-twentieth centuries. The development of summer vacation resorts and hotels in the Oakland area in the late nineteenth century had helped to stimulate settlement of the region. Although no longer as prominent a resort in the early and mid-twentieth century, Oakland still remained an important local mercantile and community center, and continued its growth throughout this period. Residential development on the outskirts of town typically occurred along pre-existing road networks. The Ashby house exemplifies much of the region's early twentieth-century residential architecture.

Research has not identified any associations with the lives of persons significant to the Oakland area's past or with events that have contributed significantly to broad patterns of the area's historical development. The architecture does not represent a particularly distinctive type, period, or method of construction, nor does it represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction. This resource has not yet yielded and is not likely to yield significant information important in history or prehistory.

Document on the property/district is presented in: Historic Structures Inventory and Determination of Eligibility Report

William G. and Josephine E. Ashby House
G-IV-A-190
9871 Garrett Highway (MD 219)
Oakland Vicinity
Circa 1930
Private

This is a two-story, three-by-two-bay, twentieth-century gable-roofed frame dwelling with a fully enclosed full-width hip-roofed front porch, a fully enclosed three-quarter-width shed-roofed rear porch, and a single exterior stone chimney. It is built on a poured concrete foundation, sheathed in a mixture of white aluminum siding and permastone, and topped with an asphalt-shingled gable roof. Windows are primarily single, one-over-one, double-hung aluminum sash and door openings are fitted with modern doors. The house faces southeast. It is located amidst several modern buildings on an open, gently sloping site on U.S. 219 about one and one-half miles south-southeast of Oakland.

The William G. and Josephine E. Ashby House, built *circa* 1930, relates to the continued expansion and settlement of the Oakland and Mountain Lake Park areas in the early to mid-twentieth centuries. The Ashby house exemplifies much of the region's early twentieth-century residential architecture.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

This is a two-story, three-by-two-bay, gable-roofed frame dwelling with a fully enclosed full-width hip-roofed front porch and a fully enclosed three-quarter-width shed-roofed rear porch. The house faces southeast and is located on an open, gently sloping site on U.S. 219 about one and one-half miles south-southeast of Oakland.

Built on a poured concrete foundation that encloses a full cellar, the house is sheathed in white aluminum siding and topped with an asphalt-shingled gable roof finished with an aluminum eave. A single exterior stone chimney with a projecting clay flue tile rises on the northeast elevation. Rectangular metal louvers in the gable peaks ventilate the attic.

Windows are primarily single, one-over-one, double-hung aluminum sash finished with aluminum surrounds. A bow-front bay window pierces the west gable, and the enclosed front porch is lit by two tripartite windows. The second-floor windows on the front elevation are ornamented with aluminum shutters. Several two-light fixed sash windows light the cellar level. The front door occupies the center bay of the enclosed front porch; this opening contains a modern metal cross-panel diamond-paned half-glass door. The rear door opening, which leads into the enclosed rear porch on the opposite elevation, is fitted with a metal cross-panel three-light half-glass door. Aluminum surrounds finish both openings.

The enclosed front porch is sheathed in formstone below window sill level and white asbestos shingles above. It is topped with an asphalt-shingled hipped roof. A set of concrete steps faced with formstone and flanked by open metal railings leads up to the level of the porch deck. The rear addition, which is clad in aluminum siding to match the rest of the house, is topped with an asphalt-shingled shed roof and bordered by a concrete patio.

A relatively modern, large, gambrel-roofed barn stands west of the house. This building consists of a concrete block foundation and walls and a corrugated metal roof. A set of garage-sized double wooden doors is located on the northeast gable, and several two-over-two double-hung sash windows light the interior. An open-sided frame leanto is attached to the northwest elevation. A modern six-sided open wooden gazebo stands directly behind the house. A modern gable-roofed one-story three-bay garage is located near the southwest corner of the house. Two gable-roofed dormers pierce the southeast slope of its roof; it is clad in a combination of wood shingles, weatherboard, and corrugated metal and topped with an asphalt-shingled gable roof. A modern one-story gable-roofed frame shed accessed by a series of eight garage doors on its southeast elevation stands far to the west. This building is sheathed and roofed in corrugated metal; the roof is finished with exposed rafter feet and the upper gables are pierced with metal louvers for ventilation.

A curving driveway that is oriented diagonally to U.S. 219 runs westward between the house, garage, and barn, terminating in front of the long shed. A sidewalk leads from the driveway to the front entrance of the house. The back of the property is wooded, but the front remains mostly open with several tall shade trees planted close to the house. The house is presently occupied and remains in good condition.

8. Significance
