Property/District Name: Ralph J. Hight & Jarlath Fitzwater House Survey Number: G-IV-A-248

Project: US 219/Oakland Vicinity Improvement Project Agency: MSHA

Site visit by MHT Staff: No Yes Name _____ Date _____

Eligibility recommended Eligibility **not** recommended

Criteria: A B C D Considerations: A B C D E F G None

Justification for decision: (Use continuation sheet if necessary and attach map)

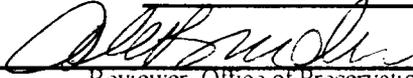

The Ralph J. Hight and Jarlath Fitzwater House, built *circa* 1945, relates to the continued twentieth-century development of the Mountain Lake Park area as a year-round residential community. Mountain Lake Park was founded in 1881 as a Christian resort community modeled after the Chautauquas begun in New York state in the late nineteenth century. Situated a short distance east of Oakland and adjacent to the B & O rail line, Mountain Lake Park in the late nineteenth and early twentieth centuries combined religious, educational, and cultural activities into a wholesome retreat. But unlike Deer Park and Oakland where the B & O had built large lodgings for its wealthy patrons, Mountain Lake Park emphasized modest, privately-owned family units, and thus small, single-family dwellings predominated. During the mid-twentieth century, this resort community's emphasis on such small, single-family houses permitted it to convert easily from a summer resort to a year-round residential neighborhood. In 1941 Mountain Lake Park contained over 500 residents. The Hight/Fitzwater house is typical of the area's mid-twentieth-century architecture.

Research has not identified any associations with the lives of persons significant to the Oakland area's past or with events that have contributed significantly to broad patterns of the area's historical development. The architecture does not represent a particularly distinctive type, period, or method of construction, nor does it represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction. This resource has not yet yielded and is not likely to yield significant information important in history or prehistory.

Document on the property/district is presented in: Historic Structures Inventory and Determination of Eligibility Report

Ralph J. Hight & Jarlath Fitzwater House
G-IV-A-248
911 Broadford Road
Oakland vicinity
Circa 1945
Private

This is one-story, three-by-two-bay, gable-roofed frame dwelling with two hip-roofed front dormers, a partially-enclosed hip-roofed front porch, a 2/3-width shed-roofed rear dormer, and a shed-roofed gable addition. It includes a concrete block foundation, wooden weatherboard-clad walls and an asphalt-shingled gable roof with an interior brick chimney. Windows are mostly two-light casement or horizontal sliding sash with wooden trim. The side entrance contains a set of modern sliding glass with wooden surrounds. A prefabricated plywood shed also stands on the lot. The house faces east and west and stands on a flat and open piece of property about one mile east of Oakland.

7. Description

Inventory No. G-IV-A-248

Condition

excellent deteriorated
 good ruins
 fair altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

This is a one-story, three-by-two-bay, gable-roofed frame dwelling with two hip-roofed front dormers, a partially-enclosed hip-roofed front porch, a 2/3-width shed-roofed rear dormer, and a shed-roofed gable addition. The house faces west and stands on a flat and open piece of property about one mile east of Oakland.

The house is built on a concrete block foundation, clad in wooden weatherboards, and topped with an asphalt-shingled gable roof finished with an aluminum eave. An interior brick chimney with a corbeled drip cap rises from the center of the house near the ridge. The building is presently painted blue with white trim. All of the dormers are clad in wooden weatherboards and topped with asphalt-shingled roofs.

Windows are primarily two-light casement or horizontal sliding sash finished with flat wooden surrounds. The front entrance is centered on the front elevation, but the door was not visible when the house was surveyed. A side entrance located on the south elevation of the gable addition leads to an open wooden deck; this entrance contains a set of modern sliding glass doors. All door openings are finished with flat wooden surrounds.

The front porch, which rests on a concrete block foundation and is topped with an asphalt-shingled hipped roof, has been enclosed at its northwestern end. The enclosed section of the porch is clad in wooden weatherboards to match the rest of the house. The open section includes a wooden deck, a slatted wooden balustrade and rail, and four-by-four wooden porch posts. An open wooden deck encircled by an open wooden balustrade and rail wraps around the southeastern corner of the building. A short flight of wooden ladder steps leads up to the deck level.

A one-story, gambrel-roofed, prefabricated plywood shed stands south of the house. This is a gable-fronted building topped with an asphalt-shingled roof. A curving macadam driveway oriented diagonally to Broadford Road leads between the house and shed, and a concrete sidewalk leads from the driveway to a set of concrete steps and the front porch. A few deciduous trees provide shade, but the property is mostly open and flat. Although the house is presently occupied and in good condition, it retains very little integrity due to extensive refenestration, reroofing, and residing.

8. Significance
