

Pine Grove
CH-703
Rock Point
Private

C. 1835; 1920

Pine Grove consists of a 2 1/2 story, three bay, Flemish bond brick dwelling initially constructed in the early 19th century. The house stands on the north side of Hill Road and includes some original acreage bordering on Brick House Cove to the southwest. Remaining vacant for many years, at the turn of the 20th century, it was radically altered in the Colonial Revival style. At this time a one-story porch and balustrade was added, the roof was replaced, and four large hipped roof dormers were added. The interior was also entirely gutted and reworked to reflect an American Foursquare plan.

Pine Grove, although extensively altered from its original form, is one of the oldest and most impressive dwellings in the Rock Point and Cobb Island vicinity. The dwelling is believed have been constructed in the early 19th century by members of the Hammersley family who once owned the entire Cobb Point peninsula.. In 1832, Henry Hammersley willed the Cobb Island peninsula to his only son John Hammersley who likely constructed a dwelling on the property soon after. John and his wife Glovinia retained ownership until the 1870's after which time it descended to their children Samuel, Helen and Alice. In 1913, the Hammersley's sold Pine Grove Farm, including 200 acres to J. Mortimer Hill for \$2000.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Pine Grove consists of a 2 1/2 story, three bay, Flemish bond brick dwelling initially constructed in the early 19th century. The house stands on the north side of Hill Road and includes some original acreage bordering on Brick House Cove to the southwest. Remaining vacant for many years, at the turn of the 20th century, it was radically altered in the Colonial Revival style. At this time a one story porch with balustrade was added, the roof was replaced, and four large hipped roof dormers were added. The interior was also entirely gutted and reworked to reflect a foursquare plan.

Now facing southwest, Pine Grove has an overall square plan, with three bays flanking the principal elevations and four bays encompassing the side elevations. Originally, the dwelling likely included two principle elevations, on the southwest and northeast ends, facing the waterside and landside respectively. A farm road connected the dwelling to Rock Point and water access was provided at the nearby Brick House Cove.

Currently, Pine Grove has a hipped roof covered with asphalt shingles. Examination of the rafters reveals the entire roof was replaced around the turn of the century, as evidenced by circular sawn boards throughout. The cornice is wide and boxed. A one story partially enclosed, full width porch stands on three of the four elevations and is supported on square wooden posts and railings. Although all of the windows have been replaced, they retain their segmental arch lintels.

The southwest and northeast principal elevations consists of symmetrical fenestration including three second story 6/6 windows above two first floor windows and a entry door near the southeast wall. The southernmost entry door facing Brick House Cove appears to be smaller than that on the opposite elevation. The southeast and northwest secondary elevations include asymmetrical fenestration. Four first floor, four second story windows, and an exterior basement entry characterize the northwest elevation. The first floor of the southeast elevation is obscured by the partially enclosed porch that wraps around from the waterside principle elevation.

The interior consists of a four-square plan. Entering from the land side, one steps into a foyer adorned with an L-shaped stair. To the right is the parlor and beyond the parlor is the living room. The kitchen is positioned behind the entry hall. Evidence of its earlier construction is most clearly visible in the basement where a hearth trimmer and relieving arch support the original interior end chimney. Also a loadbearing brick partition spans the structure on an east-west axis.

Maryland Register

not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual.)

Pine Grove, although extensively altered from its original form, is one of the oldest and most impressive dwellings in the Rock Point and Cobb Island vicinity. The dwelling is believed have been constructed in the early 19th century by members of the Hammersley family who once owned the entire Cobb Point peninsula. At the time of its extensive renovation after 1913 it was the home of the locally prominent Hill family.

In 1832, Henry Hammersley willed the Cobb Island peninsula to his only son John Hammersley who likely constructed a dwelling on the property. John and his wife Glovinia retained ownership until the 1870's after which time it descended to their children Samuel, Helen and Alice. While likely making Baltimore their home for much of their lives, according to deed record accounts Glovinia lived at Pine Grove at the time of her death, likely with her son Samuel, a bachelor. In 1913, the Hammersley's sold Pine Grove Farm, including 200 acres to J. Mortimer Hill for \$2000.
