

Hammond Cottage

CH-732

Cobb Island

Private

Circa 1930

A vernacular bungalow located on the corner of Mallard and Potomac River Drive in Cobb Island, the Hammond Cottage was constructed circa 1930, and is one of the earliest existing homes on the Island. Modest in scale and ornamentation, this is a well-preserved example of the type of simple, seasonal cottages constructed on Cobb Island during the 1920's and 1930's. Originally developed by Robert Crain in 1922, the cottage is one of a handful of surviving structures that date from the first decade of the Island's development. Contributing to the site's significance is its association with the Cobb Island Citizen's Association first treasurer, Edward Hammond. In 1926 the Hammond's purchased the property and built their cottage soon after.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The Hammond Cottage is a vernacular bungalow located on the corner of Mallard and Potomac River Drive in Cobb Island. Constructed circa 1930, it is one of the earliest existing homes on the island and unlike most other examples in Cobb Island, it is largely unaltered from its original form. A contemporary garage also shares the site.

Facing northwest, the Hammond House occupies a small corner lot in the northwestern section of Cobb Island. The dwelling is a 1 1/2 story front gable structure with a full-width, shed-roof porch. The wooden frame stands on poured concrete piers and is sheathed with original wood siding. The roof rafters are exposed and the roof is covered with asphalt shingles. A single, gabled dormer pierces the gable end on the southwest elevation, providing view of the Potomac River. Original 2/2 windows are found throughout.

Evaluation for:

National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual.)

The Hammond Cottage is a relatively well-preserved example of the type of simple, seasonal cottages constructed on Cobb Island during the 1920's and 1930's. Originally developed by Robert Crain in 1922, this cottage is one of a handful of surviving structures that date from the first decade of the Island's development. Contributing to the sites significance is its association with the Cobb Island Citizen's Association first treasurer, Edward Hammond. In 1926 the Hammond's purchased the property and built their cottage soon after. Tax assessment records suggest a slightly later construction date of 1932.

Cobb Island, long regarded as a peninsula rather than an island, was part of the acreage associated with Pine Grove (CH-703) for much of the 19th century. The first home on the Island was established in 1889, with the construction of the Vickers House (CH-724). In 1918, the entire island was purchased by Robert Crain of nearby Mt. Victoria. Quickly, Crain organized the Cobb Island Development Company with F. B. Bannister & Company as agents. By 1922, surveyors had laid out small narrow building lots and intersecting roads under the direction of civil engineer, Edmund P. Russell of Washington. The first bridge to the island, connecting Bridge Drive to Chigger City was completed in 1923. Within a few years over 80 homes had been built, serving a summer population of between 500 and 700 people.
