

Capsule Summary
SM-860
Morganza Post Office
Morganza
Private

circa 1900

The Morganza Post Office is the second oldest continuously operated Post Office building in St. Mary's County. Constructed circa 1900, the Morganza Post Office is second only to the Bushwood Post Office. Similar to many other commercial buildings located at crossroads, the building features a primary elevation that exhibits a number of doorways so that the various uses of the property could be segregated. In this particular case, the post office portion is segregated from the part of the building that serves as a dwelling. Within the next few months, the post office will be moved south on Colton's Point Road to its intersection with Dr. Johnson Road, just across the street from Chopticon High School. Prior to its removal to that location, the interior and exterior of the building should be more thoroughly documented.

7. Description

Inventory No. SM-860

Condition

excellent deteriorated
 good ruins
 fair altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The Morganza Post Office is located on the southeast corner of Morganza Turner and Point-Lookout Road in the rural crossroads community of Morganza, Maryland. Oriented on a west/east axis, the Post Office is situated on a 4,670 square foot lot. The lot slopes to the east towards a tributary of St. Clements Creek. The property is bounded by a residential lot to the east, and by Point Lookout, Busy Corner, and Morganza Turner Roads to the west, north, and south.

The Morganza Post Office is a circa 1900 two story, six bay, single-pile frame building with a gable roof and two rear additions. The exterior is clad with asbestos siding and the roof is covered with raised-seam metal. The roof is pierced by an interior brick flue and an exterior end flue on the building's south side.

The primary or west elevation is pierced on the first floor by three windows and three doors – all asymmetrically placed. The main entrance into the building is related by a door on the southern side of the elevation. This entrance maintains sidelights and a transom, while a more plain door stands immediately to the north. All of the windows on the first floor are two-over-two, double-hung sash windows. Both the doors and window are shaded by a full-length wrap-around porch that has been enclosed on the south side of the building. Portions of the porch have also been screened-in. The second floor is pierced by six, two-over-two windows.

No other elevation were investigated.
