GENERAL NOTES

1. All storm drains shall be constructed in accordance with the latest Edition of the General Specifications of the W.S.S.C.
2. Steps shall be provided in the channels of the structures involving pipes larger than 27" in accordance with the W.S.S.C.'s Standard Details.
3. Types of structures refer to the W.S.S.C.'s Standard Storm Drainage Details unless otherwise noted.
4. Information concerning underground utilities was obtained from available records, but the contractor must determine exact location and elevation by digging test pits by hand at all utility crossings well in advance of trenching. If clearances are less than shown on plan or six (6) inches, whichever is less, contact the Storm Drain Sect. of the Washington Suburban Sanitary Commission before proceeding with construction.
