Legend colors may vary from map feature colors due to the lightness or darkness of the underlying satellite image. Please use the outline color of the polygon, in addition to the fill color, to determine the type of feature.

This map depicts the locations of Federal lands, State and County Parks, forests, and other natural resource areas from files maintained by the Department of Natural Resources, Land and Water Conservation Service that are current through December 1995. In some cases, the boundaries of State Parks include land within project boundaries which has not been acquired.

Locations of private conservation areas were supplied by the Maryland Ornithological Society, Chesapeake Bay Foundation, and The Nature Conservancy. The Maryland Environmental Trust (MET) provided data on its easement areas. Agricultural districts and easement data was supplied by the Maryland Agricultural Land Preservation Foundation. These data are current through at least January 1994.

The information depicted on this map should be used for planning purposes only.
