

# THE NEGRO IN OUR HISTORY

By  
Dr. CARTER GODWIN WOODSON

\$2.15 by mail

Published in June, this book has already been adopted as a textbook for schools conducting courses in History and Sociology. The following desirable features make it the most useful book on the Negro:

It contains 20 chapters, 126 illustrations, references for future study and important documents in the appendix.

It is well-thought-out, logically developed, tersely written and beautifully illustrated.

It has a logical arrangement, accurate citations, a vigorous style and positive statements to avoid ambiguity and inspire clear thinking.

It shows an admirable balance between the economic and the political, between the purely narrative and the material.

It analyzes and discusses every phase of Negro life and history without the bias of many writers on social problems.

It is the only textbook on the Negro written from the point of view of the student and in conformity with the requirements of the schoolroom.

There is no better volume to recommend either to the man in the street or to the serious student.
