

I almost fear that there will be
so much said pro & con respecting
this expedition - that it may
bring on an inquiry - I have not
for it would be very mischievous
and would not serve any good purpose,
the weather is becoming very hot
it is time we were from hence
a few days more will see every
thing separate for every purpose
at all events I will go to the
Academy to look for it -

Yours ever
Geo. Houston
T. H. Houston

I put this to Messrs. Smith -
the same was carried through
the Dispatches of Westburyton
