

File No. 9262 Continued.

CORRESPONDENCE.

PHILADELPHIA, BALTIMORE AND  
WASHINGTON RAILROAD COMPANY.

Wilmington, Delaware, November 30th, 1908.

Mr. O. W. Connet,  
Division Engineer, Sewerage Commission,  
25 East North Avenue,  
Baltimore, Md.

Dear Sir:-

I write to ask whether when the new outlet sewer is finished, it would be allowable for us to drain into it from our buildings on the hill at Bay View. If this is a public sewer and property owners are allowed to use it in this way, we should be glad to avail ourselves of the privilege as it would furnish a safe and convenient means of drainage.

Yours truly,

(Signed) W. N. Bannard,  
Superintendent.

File No. 9262.

SEWERAGE COMMISSION,  
OF THE CITY OF BALTIMORE,  
CHIEF ENGINEER'S OFFICE,  
AMERICAN BUILDING.

Baltimore, December 14th, 1908.

Brigadier General Peter Leary, Jr.,  
Chairman, and Gentlemen of the  
Sewerage Commission.

Dear Sirs:-

The Pennsylvania Railroad is desirous of tapping the Outfall Sewer near Bay View for the purpose of connecting the sanitary drainage from the houses shown on the attached blueprint.

As to the power of the Commission to permit such connections in the county, I think this should be referred to the Law Department
