Comemorating Brotherbood Week, Feb. 15-22

Mait a minute, Mother! What's the date on

Time can rob medicines of potency and effectiveness: Check with your doctor before you use an old one. And check your medicine cabinet for others it's time to discard.

Medicines can go stale; can lose their power to do what your doctor's prescription intended. Even medicines which keep their potency should not be taken just any time. When your doctor prescribes he takes into account age, weight, development and general condition—all of which may change. So what was good for you six months ago may be worthless—or even harmful today.

To be sure in either case, ask your doctor. If he says a medicine is still right for you, fine. If, on the other hand, he suggests new medicine, make it a READ'S REGISTERED PRESCRIPTION for the same satisfaction your parents and grandparents have enjoyed since 1883. At Read's every in gredient is fully fresh and potent, thanks to the large number of Read's Registered Prescriptions filled everyday.
