MOBY DICK: The Astrologer.

Calm Before The Storm

Enjoy August all you can. It is the calm before the storm. September begins the most eventful year we will see in a long time, but August is almost dull.

The war clouds that threatened in the spring are still only threatening. About all that happens in August really is a revolution in the investment business and the stock market, and firm action by the President that booms his popularity still

Remember it was Moby Dick who told you back in April when everyone was picking on him and pole-axing him that he would be popular in the summer.

You ain't seen nothing yet! The twenty - second to the twenty sixth of August propel Jimmy Carter to recognized greatness.

August 3: Begins the surge in good luck for the President.

August 4: A revolutionary day, at least talking a good fight, possibly actual terrorist activity.

August 5: Only slightly accident prone, and the violence may be mostly in far countries, but stay off the highways if you can.

August 6: Narrow escapes from death in auto, home and factory accidents. Wear your seat belts and hard hats.

August 7: The President makes a tough decision that is a watershed for him - it makes everything better from now on.

August 8: A newsy day; most of it good except the economy.

August 10: The President gets more practical about his image, giving up a little bit on being such a sweet saint.

August 12 is Love Sunday. Babies conceived today will be Taureans with the moon in sexy Scorpio or wild Sagittarius. Remember, abortions will be less available this fall.

August 14: The U.S. image as a rich country suffers a shock.

August 15 and 16th: The President, feeling confident, makes good news with a brave decision.

August 17: Good things happen for education and the communications industries.

August 19: Everybody feels so good they're doing wild, wonderful things. They got a crazy kind of loving now . . .

August 22: The most eventful day of the month in the U.S. The stockholders pray for stability, the young people pray for change. Bet on change. Currency speculations abroad get strong.

August 23: Deliberate attempts to increase the economic turmoil.

August 25: The President, with a firm hand, does just the right thing and on the twenty - sixth and twenty - seventh gets full credit and admiration for it. Remember you read it here first.

In This Issue:

- Celebenit a rundown on award winners in a recent poll. Page 4.
- · O'Jays They have been called the indisputed top attraction on the modern music scene. Page 5.
- LaBelle Once a part of Patti LaBelle and the Bluebelles, she's now a single and going great. Page 10.

- Benson George was once a strict jazz guitarist, now he is a successful crossover artist. Page 23.
- Dexter Gordon Undoubtedly the top name in jazz saxophone playing on today's jazz scene. Page

THE RESIDENCE OF THE PARTY OF T

Notes From-

The Editor's Desk

By now you know that this is a very special issue. It is devoted to the world of entertainment, and we have attempted to bring you stories about the tops in the field.

Imagine, under one cover you get stories about the O'Jays, which is the cover picture, LaBelle, The Isley Brothers, Bootsy, Donna Summer, George Benson and Dexter Gordon.

Insisted that the writers attend concerts of the artists, so that they can bring you a live reaction to the performances. There were some frightening experiences.

For example: At the O'Jays concert, some hard-hearted security guard was adamant

about not letting our people in. So, a little subterfuge had to be used. While one person diverted the guard, the other snuck in. Sneaky

At the Dexter Gordon concert, for another, the air conditioning broke down, and the temperature in the ballroom reached nearly 100

Notice, we have a brand new type face beginning with this issue. It's a part of our attempt to fancy up the magazine a bit. This is your DAWN Magazine, so let us hear from you.

We think the type looks better - but then, what do we know? You're the boss.
