PROPOSED TRANSPORTATION PROJECT
INTERSTATE ROUTE 95
FORT McHENRY TUNNEL
BALTIMORE CITY, MARYLAND
DREDGE DISPOSAL PROGRAM

PUBLIC HEARING

A joint public hearing and wetlands license hearing will be held by representatives of the U.S. Army Engineers District, Baltimore, the State of Maryland, Department of Natural Resources, Water Resources Administration, the State of Mryland Board of Publi Works, and the Federally Highway Administration (FHWA) at the Passenger Terminal Building, Dundalk Marine Terminal, 2700 Broening Highway, Baltimore, Maryland on November 15, 1979, beginning at 7:00 P.M. and continuing to 11:00 P.M., if necessary. Additional sessions of this hearing will be held on consecutive days, if necessary.

This joint public hearing and wetland license hearing is being held pursuant to Section 10 of the River and Harbor Act of 3 March 1899, Section 401 and 404 of the Federal Water Pollution Act Amendments of 1972 (P.L. 92-500; 33 U.S.C. 1411) Title 9, Wetlands and Riparian Rights, of the Natural Resources Article, Annotated Code of Maryland (1974), the Maryland Action Plan and Title 23 U.S.C. Section 128.

The purpose of this Public Hearing is to present to the public, the proposed Dredge - Disposal Program for the I-95 Fort McHenry Tunnel, including its social, economic and environmental effects.

After an extensive investigation for a suitable disposal site and an analyses of all availabl information, the FHWA and Interstate Division for Baltimore City find that the Canton - Seagirt site to be the most practical alternative disposal site and have therefore applied for the necessary permits. The Canton - Seagirt site is the most practical alternative disposal site and have therefore applied for the necessary permits. The Canton/Seagirt site is situated west of Colgate Creek offshore of contiguous properties owned by the Canton Company of Baltimore and the Western Electric Company and is approximately 2 miles from the Fort McHenry Tunnel Site.

The City of Baltimore, by and through the IDBC, has made application for a permit for the construction of an 8-lane tunnel to carry Interstate Highway 95 under the Northwest Branch of the Patapsco River, a 48-inch water main adjacent to the tunnel, five temporary survey towers for purposes of construction alignment, the necessary restoration of Rukert Terminal Corporation "Berth A" and the construction of a containment area at Canton/Seagirt. All phases of the proposed project are located entirely within the corporate limits of Baltimore City.

The proposed tunnel is approximately 8,800 feet long and would necessitate the dredging of approximately 3,343,000 cubic yards of bottom material to be placed in the proposed confined disposal area at Canton/Seagirt. All phases of the proposed project are located entirely within the corporate limits of Baltimore City.

The proposed tunnel is approximately 8,800 feet long and would necessitate the dredging of approximately 3,343,000 cubic yards of botton material to be placed in the proposed confined disposal area at Canton/Seagirt. After placement of the tunnel elements, the tunnel trench will be backfilled with approximately 1,757,000 cubic yards of material.

The proposed action will be conducted in accordance with Executive Order 11988 (Flood Plain Management) and Executive Order 11990 (Protection of Wetlands). The proposed action would not have a significant encroachment on the 100 year flood plain but will have a minimal involvement with wetlands.

The FHWA and the IDBC prepared an Environmental Impact Statement (EIS) for the Fort McHenry Tunnel. The Final EIS (FHWA-MD-EIS-74-01-F) was approved by the Federal Highway Administration and filed with the Council on Environmental Quality on May 13, 1976. A Draft EIS (FHWA-MD-EIS-79-01-D) to address the environmental impacts of disposal of the material to be dredged for the Fort McHenry Tunnel has been prepared by the FHWA and the IDBC and is available upon request at the IDBC, 2225 North Charles Street, Baltimore, Maryland 21218. Call (396-7290) for additional information.

All interested parties are urged to attend and give the above noted agencies the benefit of their comments and suggestions relative to the proposed dredge - disposal program for the I-95 Fort McHenry Tunnel.

In addition, all parties are encouraged to attend and express their views on the proposed program, its effects, and alternative courses of action. All comments, suggestions, and stated or written questions received at this Public Hearing will be given proper consideration in the review, analysis and evaluation of the Draft EIS and in the preparation of the Final EIS to support the permit application.

Any alternative offered by the public will also be open for discussion and consideration. Alternatives previously studied and rejected will also be available for inspection.

In an effort to afford all interested citizens an opportunity to review the proposed project, more detailed information on the dredge - disposl program, including maps, drawings, the Draft EIS, and other pertinent information, is available upon request for public inspection and copying on normal working days between 9:00 A.M. and 4:00 P.M., at the IDBC, 2225 North Charles Street, Baltimore, Maryland 21218. In addition, this detailed information will be present and available for inspection at the Public Hearing. Call 396-7290 for further information.

Tentative schedules for right-of-way acquisition and construction will be discussed at the hearing.
