Applications are being taken for registration in the fall session of the Children's Developmental Clinic at Essex Community College.

The clinic accepts children with a broad range of developmental difficulties for a series of eight Saturday morning therapeutic sessions designed to build confidence and develop neuromuscular skills.

Trained volunteer clinicians work with the children on a one-to-one basis in a program of activities carefully tailored to the needs of the individual child in a stress-free, supportive situation.

While children and clinicians work together, parents meet with experts for educational programs and discussion.

"One of the primary goals of the program is to help parents develop better streams of communication with their child," said Dr. Lois Mosen Hester, clinic director. "Parents also need self-confidence in order to deal more effectively with their children's problems."

Children are accepted upon professional referral for problems such as faulty neuromuscular development, physical fitness, poverty, self-esteem, or emotional problems.

Sessions begin Saturday, October 18. Orientation for parents of children in the program will be Thursday, October 16, from 7:30 to 9 p.m.
