# —Board of Elections

Continued from page 1

"If they (independents) try to vote they will find that they will not be allowed into the voting areas. Also if Democrats try to vote Republican or vice-versa, the levers on the machines will not go down," he warned.

People will then panic and call the Board of Elections with complaints that the machines are malfunctioning, he said.

Eight Democrats, including the three frontrunning contenders, Mondale, Hart and Jackson, will appear on the May 8th ballot as candidates for president.

On the Republican side, only two names, Ronald Reagan and George Bush, appear as their party's candidates.

A list of over 400 delegate candidate names will also appear on the ballot sheet. They represent the city's two congressional districts which must each elect a total of eight winners to represent the state at the Democratic National Convention in July.

The seventh district which is a key voter block for Jackson, because of its large concentration of black voters, will run a slate of 35 female and 47 male delegate candidates.

Based on Maryland's election laws, an equal share of men and women must be selected from each of the state's eight congressional districts.

Voters will choose four men and four women from the list of names on the ballot. Some of the candidates have been approved by the presidential candidates to carry their names alongside their own, while others will run independently.

A total of 348,205 city residents are registered in the seventh congressional district. Two-hundred and nineteen thousand-three hundred and seventy-eight are Democrats and 18,231 Republicans.

## World's fastest typist contest

Secretaries, typists, word processors, and data entry personnel will have the opportunity to compete for the title of "World's Fastest Typist" and win cash and prizes in the Staff Builders Temporary Personnel Seventh Annual Typing Contest to be held May 17 and 18 at the Downtown Baltimore Hilton Hotel.

Contestants from all over the country will come to Baltimore for the event which has become a traditional part of Preakness Week.

The first Phase of the contest is the "U.S. National Open" on May 17 in which Maryland area typists and those unable to participate in other regional contests will test their skills.

Two winners of the Open will compete the following day in the World's Fastest Typist contest. Over $5,000 in cash and prizes will be given away. As part of the U.S. National Open, there will be two special "Flashtype" races in conjunction with the Muscular Dystrophy Association. Contestants will donate $5.00 to participate and will be sponsored by local businesses and individuals to help raise money for the MDA.

This year for the first time, the contest is being co - sponsored by Xerox Corporation. "Baltimore is Best" has been a co-sponsor since the contest's inception.

The official typewriter of the competition will be the Xerox 610 Memorywriter, one of which will be presented to the first, second, and third place winners of the national contest in addition to cash prizes and trophies. All contestants will be eligible for door prizes.

The U.S. National Open is scheduled from 9 a.m. to 5 p.m. on Thursday, May 17. Typists can go to the Downtown Baltimore Hilton during these hours and take the five-minute test.

## Computer camp at Bowie State

The Academy for Computer Training at Bowie State College will sponsor the First Annual Eastern Computer Camp for students, ages 8 through 13, beginning July 30 and running through August 10, 1984.

The two-week program will be held this summer on the Bowie State College campus in Bowie, Maryland. Classes begin at 9:30 a.m. and end at 2:30 p.m. with optional extended-day supervision from 8:30 to 5 p.m. for the convenience of working parents. The extended-day option is offered for an additional fee of $75.00 and includes special tennis instruction by an area tennis pro.

Students at all grade levels will concentrate on four areas: computers, tennis, soccer and swimming. Students will be assigned their own computer number and will receive "hands on" computer practice on the College's VAX 11-730 mainline and TRS 80 micro - computers. Athletics will emphasize group and individual tennis instruction, soccer workshops and supervised swimming in the olympic size pool. All activities will utilize the BSC playing fields, air-conditioned classrooms, tennis courts, and beautiful swimming facilities.

The $270 fee for the regular session includes tuition, materials, computer time, athletic instruction and insurance. This year's program is limited to 65 students.

For registration or additional information, call or write: Prof. C.G. Butts, Academy for Computer Training CCC Camp, Bowie State College, Henry Administration, Bowie, Maryland, 20715, (301) 464-3461 or 3462.

YOUR LEGAL RIGHTS

14 W. Madison Street

(301) 837-2144

By WILLIAM G. KOLODNER, ATTORNEY

Landowners, homeowners and storeowners must make sure that their property is safe for others. If someone is injured while on their property, the owner of the property may be liable for the unsafe condition. The following cases are good examples.

**BROKEN EGGS CAUSES FALL.** A 28 year old was shopping in a supermarket when she slipped and fell on broken eggs on the floor in the check-out aisle. She received a $180,000 jury verdict for her serious injuries and her inability to return to work.

**BAD TURKEY.** A man went to a party and ate poorly prepared turkey at the party. He was poisoned by the bad turkey and recovered $16,120.

**STORE OWNER'S DUTY TO PROTECT CUSTOMERS AGAINST INJURY.** the owner of a business owes a legal duty to those he invites onto his premises to keep the premises in a reasonably safe condition and to warn others of hidden defects. Failure to keep the premises safe is negligence.

**SUBSTANTIALLY** interfering with the tenant's enjoyment of the property, which causes the tenant to leave the premises.

**MURDERS IN HOUSE FOR SALE.** A buyer of a house was allowed to cancel his purchase of a house because the seller of the house failed to tell the buyer that there had been a number of murders in that particular house.

# Grandison murder trial begins

— Jury selection began today in the murder trial of Anthony Grandison, the convicted drug dealer accused of masterminding the machine-gun slayings of two people in the lobby of a Pikesville motel last April.

Jury selection began about 11 a.m. Thursday under tight security in Somerset County Circuit Court following motions by Grandison, who is acting as his own attorney.

Grandison attempted to plead guilty by reason of insanity but that was denied by Judge Lloyd Simpkins, who said the plea should have been entered earlier. Grandison also asked for a continuance, but that was also denied.

The celebrated trial began under tightest of security. The street in front of the courthouse was closed, all entrances to the building were sealed off and armed police officers were stationed on the top of the building.

Those entering the courthouse had to pass through metal detectors and many of the regular services provided at the courthouse, such as the issuance of marriage licenses, were moved to other buildings.

Prosecutors are seeking the death penalty in the case. Opening arguments are expected early next week.

Grandison is accused in the slayings of Scott Piechowicz and his sister-in-law, Susan Kennedy, in front of the Warren House Motor Hotel on April 28, 1983.

Piechowicz was scheduled to testify against Grandison in his federal drug trial. Ms. Kennedy was working for Piechowicz' wife— and her sister — Cheryl, another federal witness, who had called in sick for work at the motel.

Prosecutors, who believe Mrs. Piechowicz was the actual target of the slayings, allege Grandson orchestrated the killings from Baltimore City Jail with the aid of three other people.

Late last year, Grandison was convicted of federal witness tampering and civil rights violations in the deaths, and sentenced to life in prison. The three others — Rodney Kelly, Janet Moore, Grandison's girlfriend, and Vernon Evans — were also convicted and received various sentences.

U.S. District Judge Herbert Murray, who issued Grandison's sentence, called the slayings "one of the most heinous, cold-blooded, calculated killings I've ever had anything to do with."

The murder trial was moved to Princess Anne because Grandison maintained he could not receive a fair trial in Baltimore County.

Jury selection in the murder trial of Evans — the alleged triggerman in the slayings — is scheduled to begin Monday in Worcester County. (UPI)

MORGAN students win awards in chemistry and physics in national competition. Left to right Brian Straughan, Curtis Jones, Professor J. P. Brown of Morgan's chemistry department, Dr. Frederick Oliver of the physics department, and Dr. Warren Hayman, vice president for student affairs. In front, Ms. Cynthia Elliott.

# Longer school day faces battle

—A recommendation by State School Superintendent David Hornbeck that the school day be lengthened by one-half hour is running into opposition from two teachers' unions.

"We feel strongly there should be no lengthening of the school day without collective bargaining or without full compensation for teachers for the additional hours worked," said Harvey Zorbaugh, executive director of the Maryland State Teachers Association, which represents 41,000 teachers across the state.

"This issue has caused teacher strikes in New Orleans, Philadelphia and some other areas," he said Wednesday.

Zorbaugh said that at least 20 of the state's 24 school systems already have 6½ hours school days, but students in Baltimore City, Anne Arundel County and Queen Anne's County attend school for six hours.

Ms. Susan Davis, a spokeswoman for the Baltimore Teachers Union, which has about 7,800 members, said a longer school day does not necessarily mean a better one.

"As long as there are not enough textbooks and other materials, as long as classes are so overcrowded and as long as teacher morale is low, a longer class day will only prolong the problems," Ms. Davis said.

"We feel those problems should be solved first before anyone lengthens the school day," she said.

Public hearings on Hornbeck's recommendations, which were announced Tuesday and include proposals to add a math course and fine arts course to state high school graduation requirements, will be held June 26 in Hagerstown and June 27 in Baltimore, officials said. (UPI)

# Advocacy group charges schools with bias

— An advocacy group has filed a complaint against the city school system, claiming it practiced racial segregation by assigning blacks with learning disorders to one citywide school and whites with similar problems to two other schools.

The Joseph C. Briscoe school in West Baltimore is the focus of the complaint filed with the U.S. Department of Education by the Maryland Advocacy Unit for the Developmentally Disabled.

MAUDD officials Wednesday charged that Briscoe, one of the city's three vocational high schools for students who are mildly retarded or have other learning problems, is being used primarily for blacks. The group says white students are assigned to the two other schools— Carroll Park in Southwest Baltimore and the Venable School in North Baltimore.

If federal investigators find MAUDD's discrimination complaints to be valid, the city would have to develop a plan to place more white students at Briscoe or face the loss of millions of dollars in federal school aid. (UPI)

# Dr. Leroy Keith named high v.p. at Univ. of Md.

Dr. Keith resides with his wife in Potomac, Md.

Dr. Leroy Keith, Jr. has been named vice president for policy and planning of the University of Maryland, university president John S. Toll announced today. The appointment is effective immediately.

"Dr. Keith brings to the university sound administrative and managerial experience," Dr. Toll said in making the announcement. "His expertise in strategic planning will help the university of Maryland to define clearly its objectives in the years ahead."

Dr. Keith has been acting in the position of vice president for policy and Planning since August of 1983. He is responsible for coordinating the development of long-range academic, fiscal, and facilities planning for the five-campus University of Maryland system, and will report directly to the president.

From 1975 to 1978, Dr. Keith was chancellor of the Massachusetts Board of Higher Education, responsible for statewide planning and coordination of higher education. He served as secretary and chief executive officer of the board, which oversees all of Massachusetts' postsecondary and 59 private institutions.

Other former positions include: associate vice president for university Policy, University of Massachusetts Central Office; associate dean and assistant Professor of the College of Education and Urban Studies, Dartmouth College; and administrative assistant in the Bureau of Educational Placement, Indiana University.

"My experience in these various positions involved planning for and the management of higher-education institutions," Dr. Keith said. "That experience will be very helpful to me as I carry out my responsibilities at Maryland.

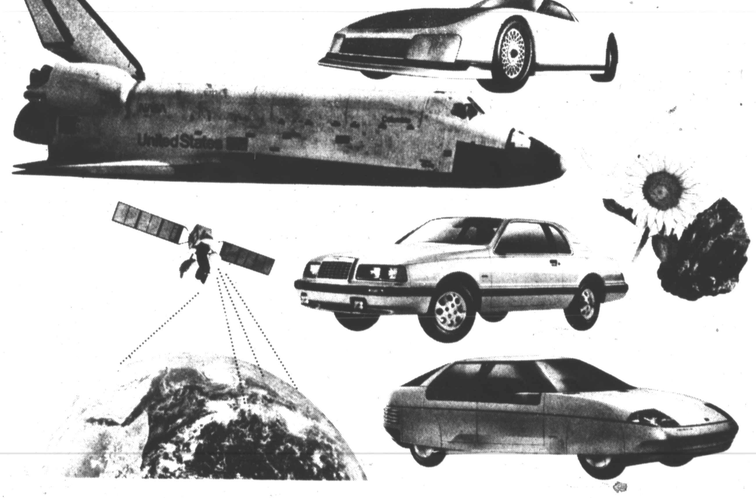
"My office's most important function is to develop an integrated planning system, combining academic, budgeting, and facilities planning. This will provide a clear direction for the setting of University - wide priorities."

A native of Chattanooga, TN, Dr. Keith received his doctoral degree in education administration from Indiana University in 1970. He also received his master's degree in administration from Indiana in 1968. He graduated in 1961 from Morehouse College with a bachelor's degree in biology and chemistry.

He and his wife, Anita, live in Potomac, MD. They have four daughters.

Get it together — Buckle up.

No Other Company In The World Can Make This Statement.



Ford Is A Leader In All These Technologies

• Aerospace • Communications Satellites • Alternative Fuels • Electronics • Automotive Manufacturing • Experimental Engineering • Aerodynamics

Soon, two-thirds of all overseas communications and almost all intercontinental television programming will travel by satellites built by Ford Aerospace & Communications Corporation.

Our technology helped guide the Columbia space shuttle home, and bring back pictures from Saturn.

Ford is a leader in alternative fuel technology; fuels which can be derived from abundant organic matter, coal, and natural gases.

Our newest electronic brain takes the automobile to a new level of sophistication. It saves fuel and improves and refines total driving performance.

We've built a laboratory on wheels, a prototype vehicle made almost entirely of a graphite fiber reinforced plastic, that's lighter than aluminum, stronger than most steel.

We've designed the most aerodynamic passenger car in the world. The incredible Probe IV. (Cd.15).

Being a leader in all these diverse technologies can pay immense dividends for a company whose main pursuit is building cars, trucks and tractors.

It gives us invaluable knowledge and insight enabling us to build more sophisticated and efficiently performing vehicles. And staying on the leading edge of these technologies not only helps us build better vehicles today, but it assures that we can and will build better vehicles tomorrow.
