

Ever hear of communications-electronic maintenance? Or wire systems installation? Or biomedical equipment repair?

Not many people have. And not many places teach these highly technical skills.

Your local Army Reserve does.
These and many other skills. Qualify, and you could learn one.

What if high-tech doesn't turn you on? No problem. We also teach hundreds of skills that are pretty down to earth. Like

food service supply. And construction.
And when you add up the dollars you'll earn, it makes even more sense to learn a skill with us.

To start off, you'll earn over \$1,200 a year for working one weekend a month and two weeks a year. Plus, another \$2,200 for the training you can split between two summers.

Interested? Then talk to your local Army Reserve recruiter today. For the number, call toll free 1-800-USA-ARMY.
