On small farms the entire family participated in the growing of crops. The economic well-being of the family depended upon how much they harvested. While a large crop generated more money to offset debts and provide for the family, a small crop reduced their profits and resulted in hardships.

Towards accomplishing these goals the Urban League investigated the social conditions of blacks and provided training programs for them as well as distributed literature for their

One of the most significant examples of this literature is on display within the exhibit.
