Black History Month

By Henry Duvall

Rooted in the 1920s but born in the '60s, Black History Month comes and goes every February giving Americans what Prof. Russell L. Adams of Howard University calls a "momentary view of the black experience."

Describing the annual observance as beneficial but insufficient, Adams, says the study of black American history continues to be relevant because many Americans have "inherited uncorrected stereotypes" of blacks and the American experience need to be made available, he stresses.

"In the past, Afro-American studies (on college campuses) were seen as correcting the historical record," he points out. "While that's still important, these studies are also seen today as a useful component of one's preparation for living in a diverse society."

He believes that the black experience is intertwined with the American experience and culture.

Although he indicates that the typical American knows very little about Afro-Americans, their importance is underscored by the fact that a civil war was fought to determine their status in society.

"We are just beginning to study the black experience in a formal sense, whereas the study of Western culture goes back centuries," says the scholar, an associate professor in Howard's College of Liberal Arts.

Adams says there has been a greater need for the study of black history and culture during the Reagan administration, which sparked a conservative mood in the nation, he contends.

"Decision makers need to have all the objective information they can receive, especially during an era of conservatism when stereotypes may take the place of (reasonable) thought," he emphasizes.

The conservative mood breeds "reliance on stereotypes and withdrawal of attention to the realities of our experience," adds Adams.

The professor says the study of black history is also relevant today because of the nation's "social amnesia," explaining that Americans quickly forget the struggle that has been waged for social justice.

Dr. Russell L. Adams, Professor of History at Howard University

"We now have generations of young people who were born since the '60s but know nothing of it," he points out. "Black studies function as a social memory bank for this generation."

Although the national observance of black history began around 1926 as "Negro History Week," it wasn't until the '60s that the observance expanded to a month-long celebration and the study of Afro-American history emerged on college campuses.

Black students were outraged to find that many American universities claiming to be comprehensive in scope had practically ignored the Afro-American presence in their curricula, says Adams.

The professor says that today the study of Afro-American history and culture enjoys increased support at many of the nation's colleges and universities.

On some campuses, the schools are considering making Afro-American studies mandatory for all freshmen, he emphasizes, nothing that Howard has such a requirement.

Says Adams, "The schools have accepted the fact that a good college curriculum includes recognition of the black presence in this society."

Black History Month
Echoes from history is cause to take a backward look - recognizing notable contributions and achievements of stars of yesteryear.

Momentous changes occurred in the years between 1861 - 1876 in the lives of Black Americans. For the first time many Black Americans were able to determine their own social and economic destinies. Some resulting in political leadership.

* Jefferson P. Long from Georgia was the first black person to serve in the House of Representatives in 1869.
