

Ans. I look at Exhibits Nos. 1, 2, 3, 4, & 5 now here shown me, I am acquainted with the lands in controversy. Said land is susceptible of an advantageous division between the Complainants and Defendants. The farm lies in such a situation that it can be equally divided among the parties, but I can't say whether there could be an equal division of buildings as I have not examined them.

11th Int. Can said lands be divided, without loss and injury to the parties interested & fully built?

Ans. - I think they can, for the reasons stated in answer to the foregoing interrogatories. If divided it would bring more, than if sold undivided.

To Corp Interrogatories filed with the Commissioner by the Defendants & answers returned, the said Eilbens Griffith deposes and says to the

1st Corp Int. (Wanted) as to this Deponent

2^d Corp. Int. On speaking of an advantageous division of the Property have you examined fixed upon any certain definite Plans of Dividing the same? Describe it.

Ans. I think a line could be run North and South or nearly so, so as to make an equal Division between the Parties.

3^d Corp Int. are you thoroughly acquainted with the Character of the entire land?

Ans. - I am Sir.

4th Corp Int. State the Character of the land lying south and South East of the dividing line you have spoken of as compared with the part of the land? Is the difference in quality considerable? Is it Silly and Rocky? What is the Character of the Meadow compared with that on the other side?

Ans. - The land that lies south and South East, is not of as good quality as that that lies south and South West and of course is not so desirable, there are some hills on it. It is pretty land, rolling land and land that is easily cultivated.

The only Public Road touching it is the Orleans and New Market road marked with a red line on the Plat filed and marked Exhibit J. B. the arable land lying in the south and South East Division, does not touch the County Road. Neither of them are worth any thing as meadow land for making hay but only for pasturing. The one on the South East part is much longer than the one on the North West part.
