

No. 4967 Equity

The witness here looks at paper writing marked Exhibit A to b. and d here shown him and says they describe the Home Place. The other tract of land is partly timbered and partly cleared land and contains about 25 acres of land, that he got from Jacob Williams, to the best of my knowledge and belief the deed had been lost before it was put on the Record. The witness here looks at paper writing marked Exhibit J. W. and says it describes the same.

be a small bill for the number of times the Doctor was there.
