

10. Can the property be divided amongst the parties in interest?

A. Not without loss and injury, as there are ten shares and it would be impossible to divide it amongst so many, as there is just one set of buildings on the farm, and they are in need of repair and no one of the interested parties feels like making any repairs at their expense.

ix. I have talked with all of the heirs and there is no chance of making any repairs or improving the property.

11. What do you think would be a fair market value for the farm?

A. I believe it would bring about \$6,500.00.

12. What success have you had with trying to manage the farm for your mother?

A. No success. This year I think I can break even, but most of the years it is losing money, and the property is getting worse all of the time.

To the general Interrogatory?

I do not think of anything more, but we ought to get rid of it before it gets too bad; It should have been sold some time ago when my mother left the farm, she is almost helpless and could not stay there alone.
