

indicated that they were not satisfied with the degree of speed, but I think that realistically most of the students recognize that you can't do the things that they ask in one day. Substantial progress has been already made. I talked with Mr. Jerome Wolff about the improvements to the road. It involves some very knotty problems because some of the road is on campus, some is off campus. The off-campus portions of the road, which involve 2 1/2 miles on the east end and about four tenths of a mile on the west end, will require a substitution in the county program with the County Commissioners which I understand is being worked out. They are favorable to doing that. The on-campus portion of the road — we'll have to find the money for that, and we're going to do it. Now I would say this, that improvements to that road — the physical improvements — will begin in time to have the road ready by the fall term at Princess Anne. This will involve a tremendous speed-up — we're going to have to move awfully fast to do it. It involves somewhere in the neighborhood of \$350,000 of total expense, but there's no question about the fact that the road needs to be improved. Now as to the portion of the road on campus, there's been a request for lighting. We obviously can't light the whole road, but I have indicated to Mr. Wolff that I want to see lights installed on that portion of the road where it actually moves in between the college buildings where students do walk at night. So we are going to follow through with that portion of our hope that we could help in that respect. Although I have made no previous commitment I think we can do that. The situation with regard to the local people — I think you're going to find that we have involved the local people in the Princess Anne area, and we are trying to get this problem solved compatibly so that there will be an enduring solution, not just an imposed restraint on the part of the State government. The bus station problem is being resolved. I am hopeful that a meeting is taking place today or tomorrow between the students and some of the local people and from what Mr. Bresler reported, that's not going to be a problem. The problem involving the public accommodations place, I think the name of it was Tullis, is something that's being worked on now. The Attorney General of the United States is involved in this, and as you know by reason of the Federal law, by July this has to become an integrated facility anyhow. I think this is going to be solved. The situation involving the cross-burnings I find most reprehensible. I am upset by the fact that a small group of people are reacting to what I consider to be very restrained steps taken by the students in such an inflammatory matter, and I have already assured the
