

answer why do you question the Child not being yours
he answered and replied that if it were his she should

have come at such a time being by September before she
burst out of crying saying she would see no man wrong

for it was Henry Smith that got it for she had not been
there passing nine days before he desired to have the use

of her body she answered him no I asked her againe why
did she not call out she said she was loath to disgrace him

so much then I asked her why she did not come away

and make her displeasure known there would have

been remedy for her she cried and sighed bitterly wishing

it had never been her fortune to have gone with him

notwithstanding she consented to his will she crying

and lamenting finding her selfe to be in such a condition

that he asked her what was her reason to lament so to be

allways, weeping she said she was with Child he answered

and said againe that was little suddenly after that caught

hot water to be got for her to set her foot in where by he

breathed downe yett he never spared making use of her

when by had occasion she crying and lamenting he said

if you are with Child I will pay you fine for I charging

her when she was in the opportunity of her travell she saying

if any body would swear her she would take her oath

the Child was Henry Smiths and nobody else so farre I

say and farther say not
