

1 Would he give us a brief explanation of the
2 scientific manner in which the 80 and the 105 was arrived
3 at.

4 DELEGATE HANSON: You mean the 35 and 105.

5 DELEGATE ADKINS: Yes.

6 What is the scientific justification?

7 THE CHAIRMAN: You mean 35 and 105?

8 DELEGATE ADKINS: Yes; as in the Committee
9 report.

10 DELEGATE HANSON: I would be happy to yield to
11 the chief scientist in charge, the Chairman of the Committee.

12 THE CHAIRMAN: Delegate Gallagher, can you
13 respond to the question?

14 DELEGATE GALLAGHER: I don't want to trespass
15 too much on the time of the committee, but I think I
16 explained that the attempt was to get, first of all,
17 a three-to-one ratio, which we felt to be important so
18 that the senate districts and the house districts would
19 be different and distinct on the basis of population.
20 We felt three-to-one was satisfactory.

21 We then approached the question of how large
