

1 amendment two appellate courts, two trial courts,
2 four tier system. Anything over and above that would
3 have to be the functional divisions created by rule of
4 the court.

5 THE CHAIRMAN: Delegate Willoner.

6 DELEGATE WILLONER: In some of the testimony
7 we received on separation of powers it was indicated
8 when the Commission used the language you apparently adopted,
9 the same language used by the Commission, intent was to
10 no longer need separation of powers clause in the
11 present Declaration of Rights in that in the other sections
12 executive power was vested with the Governor, legislative
13 power was vested with the legislature made up of the
14 two houses. In your use of this, the Commission makes
15 the same comment you do in your report, that this is not to
16 prevent a quasi-judicial function handled by administrative
17 agencies but I have a great deal of difficulty finding how
18 you could use the word exclusively and not prevent the
19 quasi-judicial functions being handled by administrative
20 agencies. I wonder if you could explain that?
