

1 of telephone calls this morning to my office and to
2 the Secretary's office indicating that persons did not
3 know of the public hearing, notwithstanding the fact
4 that these hearings are announced well in fact in the
5 chamber and are included in the announcements made by
6 the Public Information Service, and in every way that
7 we have been able to advise, made known to the public
8 generally. This is part of the over-all problem of
9 getting the word out to the citizenry of these hearings.
10 It is particularly important when a committee goes to
11 the trouble of scheduling a public hearing in the
12 evening, at a time when any citizen can come and pre-
13 sent to the committee holding the hearing any views he
14 may have, that the citizens are not informed. I would
15 therefore request each delegate to make it his business,
16 to make himself a committee of one, to publicize in his
17 own locality to the greatest possible extent the open
18 public hearings by the various committees.

19 If you have any suggestions as to means by
20 which the Information Service can get wider publicity
21 of these hearings, they will be gratefully received.
