

1 unemployment in our nation. It is called involuntary
2 idleness. Whole factories are being displaced because
3 of automation, by the rapidity of the technological
4 advances. It is cheaper for manufacturers to rebuild
5 entire factories in new locations than to attempt to
6 revise and restructure the old machinery in the old
7 location so that all over our nation and even in our
8 cities there are communities of people who are left
9 without employment when factories pull up and move on,

10 Now, there is an old concept of unemployment
11 and poverty which we have got to take a hard look at, and
12 that is that if you want to work, you can get a job and
13 you can pull yourself up by your bootstraps. At Christmas
14 everybody begins to shell out some money to the poor,
15 but none of us are really sitting down to look at this
16 problem in all of its aspects, and if we, with all of our
17 intelligence and creativity, can put a man in outer
18 space, we can solve this chronically continuing high
19 unemployment rate which results from the second industrial
20 revolution.

21 Now, in our own state, the problems are
