

A. I don't remember what he said; but what he did say satisfied the board that he was disloyal.

23d. How did he afterwards satisfy the board of his loyalty so as to be registered as a qualified voter?

A. By satisfying the board that he misunderstood their questions.

24th. Wm. D. Lankford was first entered disloyal by public repute; how did he satisfy the board that he was loyal?

A. I think it was by testimony; I don't remember, but I think it was upon the testimony of John W. Connor.

25th. John T. B. Ward and Stephen H. Whittington were both disloyal by public report and afterwards were put in the eight column as qualified voters on what proof?

A. I think it was on the testimony of George T. Wilson, but I can't remember now what his testimony was.]

26th. Did you receive applications for registration, and take oaths of applicants after the days of your last published meeting by law before review?

A. I think not.

27th. Did you receive application and make entries of qualified or disqualified on the days of review?

A. I think not.

28th. When did you finally close your books?

A. It was on last day of meeting for registration.

29th. Did you notify all applicants for registration when there were charges against them by public repute or otherwise by the testimony of witnesses, and give them an opportunity to be confronted with the evidence against them, or did you leave them to find out as best they could, whether there were any such charges?

A. To the best of my recollection we summoned them to appear before us on the days we finished, I mean the days of review.

31st. Did you summon all whom you had disqualified by public repute or only such as had witnesses against them or whom you supposed you might have ground to charge?

A. We summoned all to appear with their witnesses with the exception of those that we (the Board) were otherwise satisfied.

32d. When you say you summoned them to appear with their witnesses, don't you mean with loyal vouchers for their loyalty?

A. Not prepared to answer that question.
