

110. Any master or overseer wilfully suffering any servant or slave under his management to put quick lime in any stream of water in said county, shall forfeit the sum of twenty dollars, to be recovered and applied as directed in the preceding section.

111. If any servant or slave shall put quick lime in any stream of water in said county, without the privity or knowledge of his master or overseer, he shall, on conviction thereof before any justice of the peace for said county, be whipped, not exceeding thirty-nine lashes, at the discretion of the justice.

#### INSPECTOR AND WOOD CORDER AT CLARKSVILLE.

112. The Governor, by and with the advice and consent of the Senate, shall biennially appoint one inspector and corder of fire wood, brought by the railroad cars, or by wagons or carts, and delivered between the fourteenth and sixteenth miles on the Baltimore and Susquehanna Railroad, and within the space of one-half of a mile on the east and west of said road for sale.

113. The person so appointed for examining and measuring fire wood in the bounds so prescribed, shall receive six and a quarter cents for each cord measured by him, to be paid by the seller thereof.

114. He shall not, either by himself or any other person, buy, trade or barter for any fire wood, on the way to, or brought to Clarksville, or within the bounds of his inspection district, other than for his own family use.

115. All fire wood brought for sale by the railroad cars, or by wagons or carts to Clarksville, or between the fourteenth and sixteenth miles on the Baltimore and Susquehanna Railroad, and within one-half mile on the east and west sides of said road, shall be at least four feet in length, including one-half of the kerf, and shall be set, packed up and corded, under the direction of the inspector and wood corder, and shall be measured.

116. Every cord of wood shall be eight feet in length, four feet in breadth, and four feet in height, well stowed and packed, and where the wood to be measured exceeds or falls short of four feet in length, including half the kerf, the cord of wood shall be proportionately increased or diminished, so as to make the quantity of each cord as nearly equal as possible.
