

effect plans for the development of the waterfront property and the improvement of the waterways of the State.

**DEPARTMENT OF RESEARCH AND EDUCATION**

Chapter 508—Acts of 1941.

The Department of Research and Education is hereby created to exercise the present functions of the Chesapeake Biological Laboratory and the Maryland Weather Service, and to develop a comprehensive research and educational program covering all the natural resources of the State. The supervision of the Department shall be vested in a Commission of Research and Education consisting of five members to be appointed by the Governor from among the citizens of the State, each of whom shall have had training and experience in scientific investigation and research, especially in the field of natural resources. The members of the Commission shall select their own Chairman.

The members of the Commission shall be appointed for terms of five years from June 1, 1941, but the terms of the first members appointed shall expire in one, two, three, four and five years, respectively

The Commission shall appoint a competent Director of Research and Education, who shall have special training and experience in investigating problems in the field of natural resources and the handling of educational matters, and be a graduate of an accredited college. The Commission may also appoint such assistants as may be necessary, all personnel to be selected in accordance with the Merit System law.
