

The Upper Potomac River Commission, established in 1935, consists of three members appointed for six-year terms. The Governor appoints the Chairman, the Commissioners of Allegany County appoint a second member, and the Commissioners of Garrett County appoint a third. The Commission has jurisdiction over the water resources of Allegany County and of Election District Number Four (Bloomington) in Garrett County. In July, 1953, the Commission took charge of the Savage River Dam, erected by the Army Corps of Engineers (Acts 1935, chap. 409; Acts 1936, chap. 6; Acts 1939, chap. 143; Acts 1947, chap. 165).

 John T. Bonifant, Secretary
 James J. Lynch, Treasurer
 John B. Kenkel, General Counsel
 Robert J. McLeod, Chief Engineer

4017 Hamilton Street, Hyattsville

Telephone: Appleton 7-7700

The Washington Suburban Sanitary Commission, created by Chapter 122, Acts of 1918, consists of six members appointed by the Governor for four-year terms. Two are nominated by the Commissioners of Prince George's County and two by the Montgomery County Council. The Governor selects the other two, one from each of the two counties represented on the Commission.

When the Commission was organized, the Washington Suburban Sanitary Commission service area covered 94 square miles. In succeeding years, the General Assembly has made additions, and the Washington Suburban Sanitary District now contains about 475 square miles within Prince George's and Montgomery counties, adjacent to the District of Columbia. The Commission has jurisdiction over the construction of any water and sewerage systems built in either county beyond the limits of the Sanitary District boundaries. In Prince George's County it has jurisdiction over the operation of these same facilities. The present Sanitary District has a population of about 650,000 and an assessed valuation of approximately \$1,800,000,000.

The Commission provides for the construction, maintenance and operation of water supply and sewerage systems; it has jurisdiction over storm drainage, pumping and the location of utilities; and it provides refuse disposal service within the Sanitary District. It also operates a refuse collection system in the suburban portions of Montgomery County. The Commission has been designated as the organization responsible for the administration, maintenance and operation of the Anacostia River Flood Control and Navigation Project. As of December 31, 1960, the water and sewerage systems of the Commission contained 1,763 and 1,487 miles of mains, respectively.

Three major sources of water now supply the Washington Suburban Sanitary Commission system. The Patuxent River, which the Commission has impounded with the construction of two dams near Brighton in Montgomery County and near Laurel in Prince George's County, gives the Commission a yield of 65 million gallons a day through the Patuxent Filtration Plant. The Potomac River supplies
