The Maryland Geological Survey was established by Chapter 73, Acts of 1964, to supersede the Department of Geology, Mines, and Water Resources, created by Chapter 508, Acts of 1941, to supersede the State Geological and Economic Survey Advisory Commission, the Water Front Commission, and the Water Resources Commission.

The Department is directed by a five-man Commission appointed by the Governor for five-year terms, one term expiring each year. The Commission selects its own chairman and appoints the Director of the Department. The Director supervises activities that deal with geology and water; the Bureau of Mines supervises the mining industry.

The Department supervises topographic, geologic, hydrographic, and magnetic surveys. It prepares topographic, geologic, and such other maps as may be necessary to meet a specific need. It makes reports on the extent and character of the State's geology, mineral and water resources. The Survey publishes from time to time County Geologic Reports, Reports of Investigations, Water Resources Basic Data Reports, and Information Circulars. In addition, the Survey publishes County Topographic Maps, County Geologic Maps, a State Geologic Map, and a State Planimetric Map.

The Director serves as the Chairman of the Land Reclamation Advisory Committee created by Chapter 114, Acts of 1967 (Code 1957, 1967 Repl. Vol., 1967 Supp., Art. 66C, sec. 660).
