The Center is oriented toward a nonmedical model of education, training, and habilitation for all of its severely and profoundly retarded residents. The goal of the program is to prepare residents to return to the community within a five-year period. Individualized programs are prepared to implement this long-range goal and residents use the generic services provided by doctors, dentists, speech therapists, occupational therapists, physical therapists, and pharmaceutical

services in the local community. More than half of the residents attend day training in the community. The Center is budgeted for ninety residents.
