Established in 1884 as the Bureau of Statistics and Information, the Division of Labor and Industry is one of the oldest governmental agencies in this field in the United States, antedating the U.S. Department of Labor by one year (Chapter 211, Acts of 1884). After 1892, the Department was known as the Industrial Bureau. A reorganization in 1916 renamed it the State Board of Labor and Statistics with enforcement powers for all factory acts. Further reformed in 1939 (Chapter 747, Acts of 1939), the Board in 1945 became the Department of Labor and Industry (Chapter 938, Acts of 1945). It adopted its present name in 1970 (Chapter 402, Acts of 1970).

The Commissioner of Labor and Industry is appointed by the Secretary of Licensing and Regulation with the approval of the Governor and holds office at the pleasure of the Secretary. Under direction of the Commissioner, the Division enforces laws and regulations affecting workers and employers. It promotes harmony between industry and labor through mediation and arbitration of labor disputes and by holding consent collective bargaining elections.

The Division is organized into six sections which administer the following laws:
