Catonsville	33,206	Arbutus	20,163
Suitland-Silver Hill	32,164		

## MARYLAND'S ECONOMY, 1980—1989

From 1980 to 1989, Maryland's service industry grew at a rate of 66%, four times faster than other industries. This sector of the economy consists mainly of establishments providing services to individuals, businesses, and government. It includes such diverse enterprises as computer firms, hotels, auto repair shops, janitorial services, and hospitals. Within the services industry, high tech services, especially computer and data processing, mushroomed at the incredible rate of 106%. The largest concentration of service industries is found in Montgomery County, where 35.8% of the work force is employed in services.

Scientific and technological research leading to product development plays an increasing role in the State's economy. Federal agencies located in Maryland such as the National Institutes of Health, National Institute of Standards and Technology, the National Aeronautics and Space Administration, Goddard Space Flight Center, and Department of Defense operations have been a catalyst for the State's technology base. Advanced technology enterprise is especially strong in telecommunications, computer sciences, and biotechnology. New research parks facilitate joint research among universities, State and federal government institutions, and private industry. These parks include: The Johns Hopkins Bayview Research Campus in Bal-
