The Coastal States Organization was formed in 1970 by twenty-two member states, including Maryland. Presently, the Organization consists of delegates appointed by the governors of thirty coastal states and five territories.

The Organization was created to represent the state governors in ocean and coastal affairs. It is the states' leading advocate nationwide for sound marine practice and policy. The Organization expresses the states' shared interests and concerns in interstate and federal marine resource programs and policies. It helps coastal states exert leadership in developing and implementing national coastal policy and resolve national coastal issues without interfering in other state objectives. The Organization provides a nonpartisan forum for debate, discussion, and resolution of national coastal issues and problems. As an information clearinghouse, it also supplies coastal research and data analysis to Congress, member states, the media, and the general public.
