To find the Dominical or Sunday Letter for any given year of our Lord, add to the year its fourth part, omitting fractions, and also the number, which, in Table I, standeth at the top of the column wherein the number of hundreds contained in that given year is found; divide the sum by 7, and if there's no remainder, then A is the Sunday Letter; but if any number remaineth, then the Letter which standeth under that number at the top of the Table, is the Sunday Letter.

To find the month and days of the month to which the Golden Numbers ought to be prefixed in the Calendar in any given year of our Lord, consisting of entire hundred years, and in all the intermediate years betwixt that and the next hundredth year following, look in the second column of Table II. for the given year, consisting of entire hundreds; and note the number or cipher which stands against it in the third column; then in Table III. look for the same number in the column under any given Golden Number, which, when you have found, guide your eye sideways to the left hand, and in the first column you will find the month and the day to which that Golden Number ought to be prefixed in the Calendar, during that period of one hundred years.

The letter B, prefixed to certain hundredth years in Table II., denotes those years which are still to be accounted Bissextile or Leap Years in the new Calendar; whereas all the other hundredth years are to be accounted only common years.
