

PUBLISHER'S NOTE

Presidential Elections in Maryland is Lomond's second book intended to contribute to better understanding of contemporary Maryland culture, economics, politics and government.

John T. Willis' faithful reportage and analysis of Maryland's performance in presidential politics is, we believe, important to interpretation of present-day events and to those who want to predict and influence the future. The description, anecdotes, statistics and analysis provide a fascinating view of the history of the State of Maryland through politics.

The careful scholarship and assiduous effort to ferret out accurate data from the past will render all future students, teachers, researchers, politicians and interested citizens indebted to John T. Willis for providing this resource.

Lomond is privileged to be an intermediary to make John Willis' work and thought available to Marylanders and to those interested in presidential politics everywhere.
