As of June 30, 1980 the State established and recorded in the general fixed assets account group the estimated cost of general fixed assets based on available historical cost records. Because the estimated historical cost amounts for fixed assets were established as of June 30, 1980, changes in historical cost amounts for the year ended June 30, 1980 are not available. Infrastructure assets, consisting principally of highways, roads and bridges are not recorded in the general fixed assets account group.

Unmatured long-term general obligation and transportation bonds payable and accrued retirement costs related to general governmental activities are reflected in the long-term obligations account group.
