by law for the collection of delinquent taxes due for town purposes.

SEC. 49.    The Commissioners of Ridgely shall set apart all money received from assessments as aforesaid, and accrued interest thereon, as a sinking fund for the purpose of paying the interest upon and the principal of the bonds issued under the authority of this act, and the money so received shall not be expended for any other purpose whatsoever; it shall be deposited in such bank as the Commissioners of Ridgely elect, and any increment earned shall be applied to the redemption of the bonds and payment of interest thereon, issued under the authority of this act.

SEC. 50.    That the Commissioners of Ridgely are hereby authorized and empowered to enter upon and condemn all lands necessary for the installation, construction and operation of the system of sewers and disposal works provided for in this act, which condemnation shall be had in the same manner as now provided by law for the opening of the streets of the Town of Ridgely.

SEC. 51.    That the Commissioners of Ridgely are hereby authorized and empowered to make all the necessary rules and regulations governing the use of the sewers as provided for in this act; to provide rules and regulations governing the plumbing within or without the buildings to be connected with the system of sewers and to license and have supervision over all persons undertaking to do plumbing work within the corporate limits of Ridgely.

SEC. 52.    That this act shall take effect from the date of its passage.

Approved April 11, 1912.

CHAPTER 579.

To the General Assembly of Maryland, January Session, 1912:

WHEREAS, The present iron bridge, generally known as "Denton Bridge," spanning the Choptank River, for the purpose of free travel to and from Denton, the county seat of Caroline county, may be said to have outlived its usefulness and is inadequate for the accommodation for the present and constantly increasing movement of teams and traffic thereover (largely because of its only being a single-track bridge) ; and
