

All plank, rail, log and barbed wire fences shall be of the heights above prescribed, the height in every case to be computed from the ground or bank, if any embankment, upon which said fence is or may be placed.*

1914, ch. 769.

292. All fields and other grounds kept for enclosures in Meekin's Neck, or that part of Hooper's Island or No. 6 Election District, lying to the north of Fishing Creek, shall be considered sufficiently and legally fenced in compliance with Section 290 of this Article, which shall be enclosed with a combination woven wire and barbed wire fence, which shall be tightly stretched and securely attached to good and sufficient posts firmly planted in the ground not more than ten feet apart and the top strand of which shall be not less than forty-four inches from the ground. All said combination woven wire and barbed wire fences shall be constructed of those makes of woven wire fencing usually used in said locality, and the bottom strand of which shall not be placed higher than two inches from the ground; provided that barbed wire be tightly stretched above the said woven wire fencing and securely attached to the posts, as follows: Above woven wire fencing thirty-two inches or more high shall be stretched and securely fastened two or more strands of barbed wire, the first or bottom strand of which shall not leave a space of more than four inches between itself and the top of the woven wire fencing; the second strand thereof shall not leave a space of more than eight inches between itself and the first strand of barbed wire; and above woven wire fencing not less than twenty-six nor more than thirty-five inches shall be stretched and securely fastened not less than three strands of barbed wire, the first or bottom of which shall not leave a space of more than four inches between itself and the top of the woven wire fencing, the second strand of which shall not leave a space of more than eight inches between itself and the first strand thereof, and the third strand of which shall not leave a space of more than ten inches between itself and the second strand thereof.

P. L. L., 1888, Art. 10, sec. 165. 1882, ch. 483. 1888, ch. 387.

293. All farms, forests, and other lands, in the Third Election or Vienna District, and in the First Election or Fork District shall be fenced with post and rail, log or worm fences, well staked and ridged, and made of good and substantial materials; the said worm and log fences shall be at least four feet high from the ground to the upper rail or log, and the space between the said rails or logs for eighteen inches from the ground shall not exceed four inches, and for the balance of the fence shall not exceed six inches; the planks and all post and rail fences shall not be less than three feet and eight inches high, and the first plank or rail thereof shall be not more than four inches from the ground; the space between the second plank or rail shall not exceed five inches, and there shall not be a space between any plank or rail exceeding eight inches;

*See sec. 295.
