

charge necessary to repair and efficiently maintain the same. The map prepared shall show accurately by metes and bounds and such natural features as may exist as bounds the district or area to be benefited by such construction and establishment, together with the names of the various property owners, roads, alleys, streets, whether public or private in such district or area; the location of the natural or artificial topographic features, and the location of all parts of the system under consideration, whether within or without the district or area. Such survey shall be made and such maps, plans and reports filed within one hundred and twenty days of date of the filing of the petition.

Upon the filing of such map, plans and report, the said Commission shall submit a copy of the same to the State Board of Health, and when said Board shall approve the said system as to sanitary efficiency, design and character, then the said Commission shall fix a day and place for hearing on said petition and shall give notice thereof by publication of said petition and the date set for the hearing, in the County papers, published in or near such district or area once a week for at least two weeks. At such hearing all persons affected by the construction of the proposed system may appear and be heard upon the question as to whether the public health, welfare and convenience requires the establishment of the proposed system.

The said Commission shall thereupon decide whether or not the public health and convenience require the construction and maintenance of the proposed system, and if they decide that the proposed system is necessary for the public health and convenience they shall appoint three capable and upright citizens of Montgomery County, not residing in the district or area to be served by the proposed system and not owning property therein, to be known as Sewerage and Drainage Examiners, who shall investigate and determine the probable cost of constructing and establishing such systems and the amount to which each property owner or other person residing in said district or area is benefited or damaged thereby, and they shall return such estimate or probable cost, damage and benefit to the said Commission. The said Commission shall thereupon assess the cost of constructing and establishing the proposed system upon the persons who are interested in proportion to the amount to which they are damaged or benefited thereby. The said Commission shall then cause notice to be given to all persons assessed of the amount of assessments respectively so made on them by said Commission, by publication once a week for a period of two consecutive weeks in the newspapers published in Montgomery County. Such notices shall state the date upon which objections to said assessments of benefits and damages will be heard, such date to be not less than twenty days from the date of the return of the examiners, and copies of said advertisements shall be served upon the persons interested. If they cannot be found or of the taxpayers residing without the County, notices shall be mailed to them at their last known address as shown by the tax books, and the property conspicuously posted by the sheriff of said County, who shall thereupon return to said Commission the time and
