

be paid from the Annuity Savings Fund. Upon the retirement of a member his accumulated contributions shall be transferred from the Annuity Savings Fund to the Annuity Reserve Fund.

(2) *Annuity Reserve Fund.*

The Annuity Reserve Fund shall be the fund in which shall be held the reserves on all annuities in force and from which shall be paid all annuities and all benefits in lieu of annuities, payable as provided in this sub-title. Should a beneficiary retired on account of disability be restored to active service with a compensation not less than his average final compensation at the time of his last retirement his annuity reserve shall be transferred from the Annuity Reserve Fund to the Annuity Savings Fund and credited to his individual account therein.

(3) *Pension Accumulation Fund.*

(a) The Pension Accumulation Fund shall be the fund in which shall be accumulated all reserves for the payment of all pensions and other benefits payable from contributions made by the State of Maryland and from which shall be paid all pensions and other benefits on account of members with prior service credit and the lump sum death benefits for all members payable from the said contributions. Contributions to and payments from the Pension Accumulation Fund shall be made as follows:

(b) On account of each member there shall be paid annually into the Pension Accumulation Fund by the said State, for the preceding fiscal year an amount equal to a certain percentage of the earnable compensation of each member to be known as the "normal contribution," and an additional amount equal to a percentage of his earnable compensation to be known as the "accrued liability contribution." The rates per centum of such contributions shall be fixed on the basis of the liabilities of the retirement system as shown by actuarial valuation. Until the first valuation the normal contribution shall be two and eighty-nine hundredths per centum, and the accrued liability contribution shall be three and fifty-six hundredths per centum of the annual compensation of all members.

(c) On the basis of regular interest and of such mortality and other tables as shall be adopted by the Board of Trustees, the actuary engaged by the Board to make each valuation required by this sub-title during the period over which the deficiency contribution is payable, immediately after making such valuation, shall determine the uniform and constant percentage of the earnable compensation of the average new entrant, which if contributed on the basis of compensation of such new entrant throughout his entire period of active service would be sufficient to provide for the payment of any death benefit or pension payable on his account. The rate per centum so determined shall be known as the "normal contribution" rate. After the accrued liability contribution has ceased to be payable, the normal contribution rate shall be the rate per centum of the earnable salary of all members obtained by deducting from the total liabilities of the Pension Accumulation Fund the amount of the funds in hand to the credit of that fund and dividing the remainder by one per centum of the present value of the prospective future salaries of all members as computed on the basis of the mortality and service tables adopted by the Board of
