Green Peas and Beans.

1906, ch. 331.

27. The standard barrel for the measurement in this State of all green peas or beans in the hull, which are sold by the bushel, shall be of the following dimensions, namely: diameter of said barrel at the top shall be eighteen and three-fourths inches inside the staves; the diameter at the bottom inside the staves shall be sixteen and one-fourth inches; and the depth of said barrel shall be twenty-six inches inside; and to contain in all six thousand two hundred and fifty-three and three-fourths cubic inches, measurement by said barrel to be struck measure. The dimensions of any barrel so used shall be stamped by the inspector of weights and dry measures of the city of Baltimore upon the same in three conspicuous places, and any person using a barrel for the measurement of peas, beans and like farm products when sold by the bushel, without being so stamped, shall be fined not less than one hundred dollars nor more than five hundred dollars, said fines to be collected as other fines are now collected.
