

ing information: (a) Name or number of the operation; (b) Location of the operation as to county with reference to the nearest public road; (c) A description of the tract or tracts by metes and bounds; and (d) The name and address of the landowner or the name and address of the landowner's duly authorized representative.

182. Within six (6) months after the operation is finished or abandoned, the operator shall file with the Bureau of Mines, a completion report, on a form to be prescribed and furnished by the Director, identifying the operation, stating the area of land affected by open pit mining, stating whether the operator intends to carry on drift mining upon the premises and what provision has been made therefor.

183. If the operation is not completed or abandoned within one year following the date of filing the certificate, the operator shall, within sixty (60) days after the end of said year, file with the Bureau of Mines an annual report on a form to be prescribed and furnished by the Director, identifying the operation and stating the area of land affected by open pit mining during the year.

184. Upon receipt of said completion report or annual report, the Director shall charge the area affected by open pit mining against the bond filed by the operator at the time of registration. Should the area actually affected by open pit mining within the year exceed the estimate made at the time of registration, the operator shall, within thirty (30) days thereafter, file an amended certificate and additional bond. If the area actually affected by open pit mining during the year is less than the estimate, the Director shall issue a release of the surplus of the bond upon which liability has not been charged as aforesaid.

185. If the operator continues to engage in open pit mining of bituminous coal or fire clay beyond the period for which the certificate has been filed, a renewal of the certificate shall be filed with the Bureau of Mines together with a bond or deposit in accordance therewith, as hereinbefore provided in the case of the original certificate.

186. Within one year after the operation is completed, the operator shall place sufficient overburden in the open cut to cover the exposed faces of coal or fire clay seams and shall place such additional overburden in the open cut and level the peaks and ridges of spoilbanks to such degree as the Director may prescribe necessary to restore the surface to a condition favorable to the growth of trees, grasses or shrubs.
